*To His Excellency the Right Honourable Sir Gilbert John Elliot, Earl of Minto,
G.C.M.G., &c., &c., Governor General of Canada.*

MAY IT PLEASE YOUR EXCELLENCY :

I have the honour to submit herewith, for the information of Your Excellency, the Annual Report of the Inspector of Penitentiaries for the year ended June 30, 1900.

In doing so I beg leave to submit also a few observations upon the operation of the Act for the conditional liberation of penitentiary convicts, 62-63 Victoria, cap. 49, and the Act extending the same privilege to convicts in jails and other prisons, 63-64 Victoria, cap. 48, which are commonly known as the Ticket-of-leave Acts.

The first mentioned Act was assented to on August 11, 1899, but as the measure was an entirely new one so far as Canada was concerned, it was not deemed expedient to issue any tickets-of-leave or licenses under its provisions until regulations should have been framed, laying down the principles which should govern the disposal of applications for tickets-of-leave. None were issued until November, 1899, when after careful consideration of the regulations in force in the United Kingdom upon the subject, the conclusion was come to that, for the present at any rate, it would be wiser not to frame any regulations fettering the Minister of Justice in respect to the duty imposed upon him of advising the Governor General upon all matters connected with or affecting the administration of the Acts. Certain principles have, however, been observed in issuing these tickets-of-leave. Unless under very exceptional circumstances they are in all cases issued to first offenders only; that is to say, they are not as a rule granted to prisoners who are serving their second term. In advising the issue of a ticket-of-leave, regard has also been had to the age of the convict, the nature of the crime and such circumstances connected therewith as would enable the Minister to judge whether or not the case was one in which there existed a probability of relapse on the part of the convict. Information has also been obtained from the Warden of the penitentiary or prison, and from other available sources as to the applicant's character and conduct. In short, the utmost care has been exercised to prevent the granting of these tickets-of-leave to those not found to be entitled to them on account of their antecedents or their conduct in prison, or both.

It is, of course, too soon to speak with anything approaching absolute certainty as to the eventual results, beneficial or other, of these Acts, but I think the information in my possession warrants me in saying that so far their operation has been attended with very satisfactory results. The figures given in the statistical tables of the report of the Inspector of penitentiaries, come down to June 30, last only, a period of about seven months from the date of the issue of the first ticket-of-leave. But taking the results for one year, I find that in the year following November 24, 1899, the date of the first ticket-of-leave issued, 145 tickets-of-leave were granted, of which 115 were issued to penitentiary convicts, the other thirty being issued to persons confined in jails and other public prisons. Of the total number, 145, four have been forfeited, as

64 VICTORIA, A. 1901

provided by the Act, on account of the holder being convicted of an indictable offence, and one has been cancelled for breach of its conditions, making a total of five licenses revoked, a proportion of 3.45 per cent of the total number issued. This very small proportion of licenses forfeited and cancelled shows at least that the very great majority of the recipients of this favour were not unworthy of it. It leads one to hope that by administering the Act with proper caution the results in the future will be such as to fully justify its enactment.

I have the honour to be,

Your Excellency's most obedient servant,

DAVID MILLS,

Minister of Justice.

DEPARTMENT OF JUSTICE,

OTTAWA, DEC. 10, 1900.

REPORT

OF THE

INSPECTOR OF PENITENTIARIES

FOR THE

FISCAL YEAR 1899-1900.

To the Honourable
DAVID MILLS, Q.C.,
Minister of Justice.

SIR,—I have the honour to submit herewith reports and statistics in connection with the Penitentiaries of Canada and the Territorial Jails for the fiscal year ended June 30, 1900.

The summarized tables do not include the statistics of Territorial Jails. These will be found in Appendices M and N.

SESSIONAL PAPER No. 34

REMARKS.

Kingston.—Improvement in the management of this institution has been quite marked, especially in the business and industrial departments.

St. Vincent de Paul.—There is nothing new to report regarding the administration of this penitentiary.

Dorchester.—During the period in which the penitentiary was in charge of the deputy warden a number of absolutely necessary improvements were undertaken which, if carried out, will enhance the safety and convenience of the prison.

Manitoba.—The management of this prison is seriously handicapped by the lack of an instructor capable of carrying on building operations.

British Columbia.—I have not visited this penitentiary since 1895, and consequently am not in a position to judge of its condition. It is evident, however, that an enlargement of the cell accommodation is a pressing necessity.

Regina.—During the past year the jailer has had the assistance of a capable and reliable deputy jailer and bursar. If the subordinate employees were selected with the same care and discretion the value of the prison labour and the security of the institution would be greatly enhanced.

Prince Albert.—The death of Jailer Montgomery occurred in January last. His official record is short but extremely creditable. Since the death of the jailer the institution has been in charge of Deputy Jailer Kerr. A considerable percentage of the outlay during the year has been in connection with works of reconstruction. This was necessitated by the fact that the building was originally constructed without any reasonable regard for sanitation, security or convenience. The expenditure includes also the cost of heating and keeping in order the court-house and attached offices, an expenditure chargeable to the Department of Public Works.

I am, sir, your obedient servant,

DOUGLAS STEWART,

Inspector of Penitentiaries.

OTTAWA, September 1, 1900.

APPENDIX A

WARDENS' REPORTS

The foregoing remarks naturally introduce the important but (politically speaking) dangerous subject of prison labour and how to utilize it. How shall we employ convict labour so as to best promote the welfare of the convict and do the most to recoup the state for the expense of his imprisonment? The only rational answer is: "Engage in any work that is healthful and useful and profitable." I am aware that before this answer reaches the ear of the government it is qualified by the addition of the words: "and does not come into competition with free labour and does not interfere with the plans of contractors who may desire to supply the wants and requirements of the state." I am also aware that so long as this latter consideration is paramount there is little hope of finding profitable employment for any large number of men beyond the requirements of our own walled city. I will not discuss the subject further at present, but you will pardon my saying that, aside altogether from the question of profit and loss, I feel that the state is in duty bound to establish industries or otherwise provide employment for our labour such as will inure to the healthful discipline and consequent reformation of the unfortunates in my charge. In this behalf may I indulge the hope that you will repeat your oft-repeated recommendation that we be afforded the opportunity to manufacture, for state use exclusively, such articles as mail bags, mail carriers' uniforms, soldiers' boots, trousers and great-coats, saddles, blankets, bridles and scores of other commodities now furnished by contractors and paid for by the people, who also pay for maintaining in comparative idleness the inmates of our penitentiaries.

The penitentiary farm already gives employment to a fair number of convicts, but the number may easily be doubled either by extension of premises or the conversion of our grain fields into vegetable gardens for the production of kitchen supplies to be used in the prison. I know of nothing more beneficial to the average convict than a thorough course of garden farming under the control and direction of a competent and skilled instructor, and I may, in the near future, ask your assistance in putting this opinion into practical effect. Granting that it is not in keeping with sound public policy to engage convicts in profitable employment and that it is better to support them in idleness, there is no good reason why we should not establish an experimental farm and conduct it for the moral benefit of the prison population. Seriously, however, there is much to be said in favour of making the farm a training school for the better classes of penitentiary convicts.

The quarry and stonecutting departments have been usefully employed in preparing material for the new cells, while the carpenters, blacksmiths, tinsmiths and painters are dependent upon the wants of the prison or its officers for employment.

The binder twine industry is deserving of special mention because it is essentially a government enterprise, manufacturing for the market and competing with other factors of the same article. The factory affords employment to forty convicts, and, notwithstanding the unprecedented high price of material and the misrepresentations of our competitors and the lamentable crop failure in Manitoba and the North-west, we have been able to return to the public treasury a gross revenue of about \$60,000, and after paying for cost of material of all kinds, running expenses, including officers' salaries and interest on investment, we have a balance on the right side of the ledger of over \$8,000. Not having sold any part of our output by contract, being confronted by competitors who had secured an early advantage in the market, and having especially suffered by cancellation of orders in consequence of the shortage of crops, we are unable to report an empty warehouse at the close of the year, but the season is not yet far advanced, and we hope to carry over no more than our legitimate share of the year's over-production.

I am glad to be able to say, in answer to the malicious misrepresentations of interested parties, that our twine has stood the test amongst farmers, and that from the hundreds of our customers there have come to us not more than three or four complaints as to the quality of our product, while scores have, unsolicited, favoured us with certificates of its excellence. Having secured a firm footing in the markets of Canada, and having the advantage of enlarged experience to aid our management, I do not fear the result of the ensuing year if permitted to conduct the twine factory on lines similar to those of the year just closed.

Regarding the manufacture of twine as compared with other industries in relation to value as prison employment, I am obliged to say that it does not afford the convict

SESSIONAL PAPER No. 34

so valuable nor so useful a training nor an experience so elevating and instructive as is furnished by most other mechanical employments. The twine factory is not an easy place to discipline. On quitting prison the convict who has learned the management of a jenny or a baller will be likely to find himself vanquished by the army of boys and girls employed in outside factories. Notwithstanding all this, the binder twine industry is a blessing compared to idleness, and I hope that no move will be made to abolish it in this prison until it is decided to substitute something better.

Population—Admissions—Removals.—At midnight, June 30, we had in charge 536 males and 11 females; total, 547. Of these over 17 per cent are repeaters, having previously served one or more terms of imprisonment in this penitentiary. Several are serving a third or fourth term, and one was admitted for the tenth time. Number of life convicts, 34. Of our total population 62 have come to us by transfer from other penitentiaries. Admissions during the year, 179; removals, by discharge, pardon, license and death, 202; reduction of population, 23.

Conduct and Punishment.—Two convicts were reported for assaulting officers during the year. Both were sent out for trial and convicted. One was let go on suspended sentence; the other received two years additional to his previous 20 years sentence. Corporal punishment (flogging) was administered but once, and that was in pursuance of the original court sentence. Of minor punishments for trivial offences there were 195. Eight were sent to prison of isolation until they served six months without report. Of the others, some were confined in 'punishment cell' for periods varying from a few hours to a few days, some were put on half rations, some were deprived of light and books, and others were deprived of a few days' remission. On the whole, the conduct and industry of convicts has been fairly good.

Hospitals.—By reference to Surgeon's report, it will be seen that death visited us 13 times during the year. Though this number is above the average, the records afford no explanation other than mere coincidence. Nearly all were chronic sufferers whose demise was not unexpected. Influenza and pneumonia visited us as epidemics at the usual seasons, but, taken all together, the mortuary and health statistics of the prison compare favourably with those of the outside world.

We close the year with 38 inmates of the hospital for the insane. The number is large and taxes our asylum accommodation to its utmost. Some of the cases are neither aggravated nor incurable; some are. The proper disposition of insane criminals is a serious question, and one which, in the near future, will force itself upon the public for early solution. In my humble opinion an irresponsible human being has no proper place inside the walls of the penal prison.

Some become insane after incarceration; others (too many I fear) are insane before admission. One such was recently removed by order of the Minister of Justice, and there are others who should be removed. If the law in this behalf has, from any cause, become inoperative, it may become necessary, in the interests of humanity, to admit to penitentiary only upon certificate of mental soundness.

Pardons.—His Excellency was pleased to exercise the prerogative of pardon in 26 instances. All the recipients of this favour had served a greater part of their respective sentences and had made a good prison record or had produced certificate of rapidly failing health. In one instance, though pardon was granted, death reached the suffering convicts' cell before the missive of mercy arrived.

Conditional Liberation.—Under the Act providing for the conditional liberation of convicts, His Excellency the Governor General has been pleased to grant license to be at large upon certain conditions to 20 inmates of this penitentiary. Thus far all of these seem to have observed the conditions of their parole and are earning their livelihood outside the prison walls. As conditional liberation is granted only to those whose prison record warrants the belief that they are fit to be at large, the effect upon the general conduct and industry of the more hopeful class of convicts is plainly noticeable. The salutary effect of hope is augmented in proportion to the firmness with which the rule is adhered to—That none are to be liberated through outside pull or influence, nor unless their conduct, for several months at least, has been exemplary to a degree warranting the conviction that longer imprisonment is not necessary to complete reformation.

Some penologists hold that no convict should be discharged directly and suddenly from prison, as the step is too large and too long for him to take at once. Absolute discharge after a period, more or less protracted, on parole, will, no doubt, make easier and safer his reintroduction to society and citizenship. The paroled convict is still, in the eyes of the law, a prisoner, and his release is simply a test as to his ability to maintain himself as an honest man. He is, therefore, more likely to behave himself than if he were pardoned and set free without restraint. And having maintained himself and his character during the time of his parole, he is not very likely to return to vicious habits when the day of freedom arrives. Cautiously administered, the Conditional Liberation Act will prove a benefit and a comfort to prison management and a blessing to the better class of convicts.

Age.—Of our 547 convicts, 27 are under 20 years of age and 6 are over 70. One life prisoner was but 14 when admitted and another is sent to us for two years at 16. The average term of imprisonment for life convicts is 15 years. If the youth referred to above be pardoned at 30 years of age, what can be expected of him! What can be expected of any man who spends 15 years of susceptible life in association with old and hardened criminals! If it be necessary to send boys and girls, mere children, to the penitentiary, it were better to give them the benefit of a five or ten years' course at some reformatory in order to establish some degree of character before admission to the penal prison.

Classification.—The proper classification of convicts in this penitentiary is still contingent upon the completion of the new wing with its modern cells and the adoption of definite and rational rules as to the management of the prison of isolation. When the occupants of the isolate ward are made to constitute one class—incorrigibles, if you like—and the new wings to furnish homes for another and better class or classes, I hope to be able, with your assistance, to arrange for three distinct grades or classes to be distinguished by uniform as well as by location and abode. When this is accomplished, our school population may well be doubled and more time be given for instruction.

Diet and clothing.—But few complaints were made during the year as to the dietary or character of food furnished, but I am aware that frequent loathing is produced by the continuous and monotonous round of soups and boiled meats and the unbroken absence of roast and relish. This I hope to be able to remedy in the near future, by the installation of a large range in connection with our cooking furnaces.

Complaints as to the shirting have been frequent, both from those who have to wear as well as those who have to wash and repair. The substitution of cotton for wool for summer wear will, I feel confident, remove the dissatisfaction and result in a considerable saving financially.

For detail statements as to the work accomplished in the various departments—repairs and improvements—quantity of goods purchased and consumed—the industrial disposition of convicts—the cost of particular services and commodities and other information, I beg to refer you to the several appendices herewith inclosed.

I am thankful for the kindly consideration I have always received at the hands of the Minister of Justice and from every member of the penitentiary branch of his department. To your untiring assistance and direction in every emergency, and the uniform kindness and efficiency of the penitentiary staff I attribute whatever degree of success has attended my administration.

I have the honour to be, sir,
Your obedient servant,

J. M. PLATT,
Warden.

SESSIONAL PAPER No. 34

(APPENDIX A.)

KINGSTON PENITENTIARY, October 15, 1899.

The Inspector of Penitentiaries,
Ottawa.

DEAR SIR :—Upon your recommendation and by direction of the Minister of Justice, I attended the annual congress of the National Prison Association of the United States, held at Hartford, Ct., during the last week of September, ult.

Besides the officials of the association (selected from the most advanced penologists), I enjoyed the pleasure and profit of meeting delegates from all the important prisons and reformatories in the Union. The people of Hartford did their utmost to make the occasion one of pleasure as well as profit, and the public welcome accorded the association, forcibly impressed me with the opinion that the cause of prison reform has not only enlisted as its friends and advocates many of the ablest and most influential men in the land, but has secured a firm hold upon the sympathies of the people, especially of the better classes.

On Sunday the pulpits were given over to the members of the Chaplain's association and the church-goers of the entire city listened, both morning and evening, to eloquent and powerful appeals in behalf of prison reform.

On the following morning the work proper of the association began, and the reading and discussion of papers upon every conceivable subject connected with prisons and prison life and prison management occupied the congress by day, while the more important questions were made the subject of speech and essay by prominent penologists and philanthropists every evening of the week.

Having so recently commenced the study of prison management and the application of the principles of penology, I could not fail to appreciate the privilege of improving what, to me, was a golden opportunity. To be associated, but for a single week, with men such as Ed. S. Wright, Z. R. Brockway, Frederick Howard Wines, Charles Dudley Warner, Frank B. Sanborn, Charlton Lewis and others of that notable class, all zealously and energetically engaged in the work of prison reform and prison management was, for me, like a sudden plunge into the very depth of the sea whose shores I had, as yet, scarcely ventured to approach. I heard everything that was to be heard and have returned surfeited with the best thoughts of the age which, by the aid of time and experience, I am determined to digest and utilize for the benefit of the institution for the management and welfare of which I am largely responsible.

A remarkable feature of the congress was the large number of eminent persons in attendance as members of the association who are in no way connected with prison work. Charles Dudley Warner, Howard C. Wines, F. B. Sanborn and many others equally notable, were present throughout and gave valuable aid in all discussions. It is plainly discernible that the prison association is gradually reaching the masses of the American people with its gospel of reform, but there, as here and everywhere, there is a vast amount of old-time prejudice and old-time ignorance and old-time barbarity to overcome before the doctrines promulgated at the recent congress will be made practicable by the consensus of public opinion.

Notably amongst the addresses delivered, I may mention that of the Hon. C. T. Lewis, of New York, on the 'Indeterminate sentence,' which was as remarkable for its elegance and eloquence as for its powerful arraignment of old-time opinions and practices.

Carrol D. Wright, in an exhaustive paper on prison industries, showed that great advancement had been made in the last twenty years, but that they encounter the same abominable and senseless opposition in the United States as we meet with in Canada in extending the blessing of industry to the inmates of our prisons

64 VICTORIA, A. 1901

Warden Wolfer, of Minnesota, ably pointed out the connection between prison industries and discipline, and the discussion upon this and other papers constituted one of the most interesting and valuable parts of the programme. Altogether, the occasion of the congress was, to me, decidedly interesting, pleasurable and profitable. I needed just such a lesson, and I am thankful to the Minister and yourself for enabling me to improve the opportunity when it presented itself.

I have the honour to be, sir,
Your obedient servant,

J. M. PLATT,
Warden.

(APPENDIX B.)

REPORT OF THE KEEPER OF THE PRISON OF ISOLATION.

Memo. for the Inspector.

I have the honour to submit my annual report for the year ended June 30, 1900.

This department was opened in 1894 with misgivings on the part of many for its success, but I may say as to myself I never entertained any doubt of it being made a success, and to-day, the good results attained are manifest. This is very gratifying indeed.

I believe that the more completely isolated the place is still better results will be achieved, and for this reason I have asked that sheet iron doors be placed on entrance to corridors, ranges one and two, block A, where the penal class is confined; as to this portion too much precaution cannot be taken. Rule 149 of the penitentiary regulations should be strictly adhered to.

The works now in progress are weaving, making mats, brushes, mattresses, knitting and repairing. Much might be said as to the nature of the work suitable for this department.

It is the practice of changing the guards from time to time. This is detrimental to the discipline and good working of the department. Permanent officers should be appointed, and those of experience and firmness.

My relations with the staff, from the Warden down, have been most cordial.

I have to thank you for the courteous treatment and many good ideas given me from time to time, which I have not been slow to take advantage of and put into practice, also with your forbearance of my shortcomings.

Æ. D. O. MACDONELL,
Keeper of the Prison of Isolation.

SESSIONAL PAPER No. 34

(APPENDIX C.)

REPORT OF THE CHIEF TRADE INSTRUCTOR.

June 30, 1900.

Memo. for the Warden.

I have the honour to submit the following report of the various works which have been performed during the year ended June 30, 1900 :—

Water Tower.—This building is now complete and ready for occupation.

North Lodge.—The metal covering of roof having become much worn and leaking badly was removed and a new covering of galvanized iron on rolls was laid.

Roofs Generally.—Several roofs received necessary repairs and painting ; also chimneys repointing.

Hospital.—The outer face of walls of cells, cell doors and windows have been painted, floors oiled, cells whitewashed and cupboards for stores set up in central corridor of ground floor.

Asylum.—Walls of corridors, lavatories, cell door barriers and windows have been painted, four additional cells have been added by utilizing the corridors north end of the first and second stories.

Tin and Paint Department.—This department has been removed from the carpenter shop to the room on second floor, south end of asylum building. By this change more accommodation has been secured for the handling of work. The printing office is also in this room, and all under the supervision of the instructor.

Tramway.—The tramway running through the prison yard and to the quarry had been much dilapidated and had not been in use for several years. The rails have been removed and the rotten ties taken up. Prison yard and the roads have been improved by levelling and grading that portion where the tramway had been.

Deputy Warden's Quarters.—The bath room in the deputy warden's quarters has had some alterations, new floor laid, walls wainscotted four feet high and all neatly painted.

Farm Roads.—The road allowance running north from No. 2 stone barn through farm to the Bath Road was improved by removing the soil to the rock and refilling with stone to grade.

Boiler House.—The three new boilers installed by the engineer have been bricked in, smoke stack made and set up, polished steel doors placed in vestibule, the large steam pump in plumbing shop supplying water in prison was removed to boiler house, a trench for the suction was excavated, mostly in the solid rock and refilled with clay after the pipes were laid.

Warden's Residence.—A cut-stone chimney was built over kitchen ; a passage was made in wall north of Warden's house connecting garden with field.

Tailor and Shoe Department.—These departments have been busily employed in making clothing for Indian Department, uniforms for officers, and convicts' clothing.

Prison of Isolation.—The four hand looms in the prison of isolation have been constantly employed in making towelling. Two thousand five hundred yards of towelling was made during the year. Coir mats were also made with fair success.

West Wing Reconstruction.—This important work has been pushed forward and much work has been done—nearly 500 M. brick and 4,800 cubic feet of cut stone laid, 304 vents (made in blacksmith's department) and the sanitary fittings were built into walls as work progressed. Masons are now busy turning the arches of the fourth or last tier of cells.

General Work.—Constant repairs to buildings are going on, repointing of walls, painting of iron barriers and wood work and whitewashing of interior of buildings.

E. J. ADAMS,
Chief Trade Instructor.

ST. VINCENT DE PAUL PENITENTIARY.

ST. VINCENT DE PAUL, August 18, 1900.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

SIR,—I have the honour to submit to you herewith my annual report for the fiscal year, 1899, 1900, with all statistical returns required.

CRIMINAL STATISTICS.

The number of prisoners in the St. Vincent de Paul Penitentiary has gradually increased since I took charge of the institution.

In 1898 the number was	418
1899 “ “	447
1900 “ “	463

Notwithstanding the increase of the population of the penitentiary, the discipline has been maintained with a very satisfactory success.

Inflicted punishments have been less severe, and the regime followed made as to conciliate the mildness to firmness in the application of discipline.

I have endeavoured by appropriate means to operate the moral reform of the convicts. It is important to study carefully the statistical returns in order to be exactly and correctly posted in the good achieved by the new regime.

Financial Condition.—The summary of the expenditure for the fiscal year ended June 30, shows a total of \$94,153.43, and the cost per capita compared with the previous year indicates a reduction from \$226.54 to \$215.59. This is a result for which we are entitled to take credit, and which will, later on, attain a still more satisfactory point. We have, properly speaking, no revenue at the St. Vincent de Paul penitentiary, because we have no workshops to produce such.

I have the pleasure to state that next year a satisfactory revenue might be derived from the aqueduct of the penitentiary and the electric light, which, according to the orders of the Department of Justice, will be in operation during the present fall, should the population of this village be allowed to enjoy that privilege.

Our revenue, if compared with that of Kingston, which is \$37,243.02, especially produced by the binder twine industry, only amounts to \$1,673.04, but putting aside the sum raised by that industry, the difference between the revenue of the two institutions is but \$1,777.53.

Hygiene.—The report of the physician and surgeon of the penitentiary is an interesting and important chapter in our annual report.

The statistical returns show a state of things which should be remedied without further delay.

The facts as stated are correct as to the instruments used for the preparation of the culinary aliments. These instruments are capable of producing the disorders mentioned by the doctor, as he has recorded in his books, though great attention has been given to the sound and wholesome quality of the food.

I call again the attention of the authorities to the fact. Immediate orders should be given to change the present system and eliminate the cause of the casualties arising from the use of the boilers in the kitchen.

The reasoning of the physician is based upon scientific principles.

The old hospital, as improved, affords to-day the accommodation so much needed in the past by the patients, and if they have not the convenience accessible in the

SESSIONAL PAPER No. 34

Kingston penitentiary, they have at least improvements which afford them the hygienic means necessary to the recovery of their health.

The isolating hospital for contagious diseases has already rendered important services in preventing contagion. A convict has passed through the phases of typhoid fever of an adynamic type. The state of this patient has caused the physician great uneasiness, but, thanks to isolation, the contagion has not, so far, claimed any other victims.

From an hygienic point of view, the physician's remarks as to the stone shed are in accordance with the facts. The wretched shed affords no protection to the health of its inmates.

I called the attention of the Department of Justice to that fact in my last year's report, and now I can but repeat the advice already given.

I concur also, in the opinion of the physician as to a balcony for the hospital.

Cases of tuberculosis are numerous, very numerous, and the patients must have air and light to lead them to recovery; science and humanity require this improvement.

I share the opinion of the physician as regards the night duty which has, so far, been put in operation in no other penitentiary of the Dominion excepting that of the St. Vincent de Paul.

To protect the health of officers which has been injured by this ultra-exacting duty, in my last, I assumed the responsibility of a change, and the result, to my mind, is very satisfactory.

Insane.—I call the attention of the Honourable Minister of Justice to the fact that avowed and confirmed idiots, recognized as such by the physician's reports, should not be sent, by courts of justice, to the penitentiary, but to special asylums for the insane.

I warmly endorse the contention of Dr. L. A. Fortier as to his right to a ten days holiday as well as the other officers of the penitentiary without loss of salary during his leave of absence. His work is considerable and arduous and deserves to be recognized by the authorities.

Works.—The enumeration of the various works done, up to the end of the fiscal year 1899-1900, will, I hope, be found satisfactory.

Old Hospital.—The old hospital and the surgeon's offices have been enlarged and renovated, and the contagious hospital completed.

New Protestant Chapel.—The new Protestant chapel has been finished and is now open for the celebration of divine service of the Protestant community. It is a finer and much larger place of worship than the former one.

New Stable.—The new stable is a large and well built structure, provided with all improvements for the keeping of the horses of the penitentiary.

I do not refer to other little matters which should be attended to, in the course of the present year, the administration will have to keep an eye opened on the details in proportion as their execution will become necessary.

Repaired Lodge.—The new lodge at the northern entrance to the yard of the penitentiary is being carried on since May 1, and will be an imposing structure, worthy to match with the front building of the penitentiary. Besides the gate entrance, spacious rooms will serve in the interior, for the stores, elevator and armoury. A great inconvenience will be removed in having the firearms—revolvers and rifles—taken away from the inside of the prison proper.

The improvements on the front roadway have been continued by the excavation of the road and the completion of revetment walls and macadamizing.

The west gate has been made more solid and offers, now, more security than in the past.

Sewers.—The temporary works which have been the cause, so far, of many disappointments are pretty far advanced. Preparations have been made for sewer beds, during summer time, in a way to offer no more danger to the public health of the neighbourhood.

Brick-making.—A large quantity of clay has been drawn last winter to carry on brick-making this year, in order to supply, in future, the bricks required for the building of the penitentiary.

As reported in the return of the Chief Trade Instructor, difficult but necessary excavations are being carried on in the yard, to have a pipe duct from the boiler-room, under the building of the industrial department to the new stable, in order to supply the water required. This duct is being built in cut stone.

Piggery.—The piggery which is an important factor in the supply of meat to the steward's department, has been repaired and improved in order to give more space. The farmer has now under his care nearly 300 pigs of a good and selected breed, and expects, in the course of this fiscal year, to produce about 30,000 pounds of pork which will reduce to a minimum the supply of this kind of food (intended for our convicts) by contractors, and be a great saving to the penitentiary. An important addition of pens will have to be made in the next fiscal year to insure that purpose or result.

Many minor works have also been carried on, such as repairs to the breakwater, to the pump-house, to the warden's house, to the dome and dormitories.

The old stone-house, formerly used by the Protestant Chaplain, has been pulled down; its actual state of decay and dilapidation making its further habitation impossible.

The buildings and derricks at the quarry have also been repaired and improved, in order to have a gang of men employed at the exploitation of the stone required for the penitentiary.

A very important improvement has also been introduced by the connection of an internal telephone, with the deputy warden's office, west gate, farm barn and quarry.

Industries.—Industrial departments in the St. Vincent de Paul Penitentiary have not so far taken very considerable importance.

As a general rule, convict labour had not to compete with outside industrial products, and this I am much pleased to say. Our various departments only manufacture for the following purposes or wants: 1st. To provide the officers on the staff with winter and summer uniforms. 2nd. To supply the convicts with uniforms and discharge clothes, &c. 3rd. For prison labour generally; all that concerns the construction of buildings necessary to the working of the institution and their keeping in repairs. Since I am at the head of this institution all the stone required for the construction of buildings is being extracted from the quarry, cut and laid, under the supervision of competent instructors, by convicts employed in our various departments. Among others, two important buildings were built since my taking charge as warden of this institution by convict labour, and have been completed in the course of the last year viz., a cut stone stable 160 feet long by 38 wide; a fine and solid structure, having, in the interior, the required dispositions to easily distribute the fodder to horses and at the same time secure them necessary hygienic conditions.

The other important building alluded to, is the one known as the North Gate Entrance, intended to give entrance from the exterior to the yard proper; this building is provided with rooms for the storage of goods and provisions of the penitentiary and to ensure the security of fire arms which so far, at the great prejudice of the institution, have been kept in the interior.

This building will, at the same time, be the completing of the inclosure wall and remove the danger occasioned by the old temporary walls.

I understand that we cannot for the present, in the St. Vincent de Paul Penitentiary, have works, shops and industries capable, as the binder twine at Kingston, to assure such a big revenue as to decrease the expenditure.

Conclusion.—Before concluding this report, I feel it my duty to point out matters which will affect the future administration of this penitentiary, in a very sensible way.

The population of the penitentiary is increasing in a fast and astounding degree. Montreal, the metropolis of Canada, in reason of course of its own population (not of its morality) supplies the largest number of criminals sent to the penitentiary. For last fiscal year criminals sentenced from the district of Montreal to the penitentiary, over-rated the number sent from all the other districts, including Quebec, Three Rivers, and some other cities. There is no doubt that this movement will continue, and, in my opinion, the Department of Justice has to be ready for any emergencies. We are short of accommodation. We have to day 472 convicts and only 472 cells for the accommoda-

SESSIONAL PAPER No. 34

tion of that number; the immediate building of a new wing is the foremost object to be kept in view. The fact is that so far it has been neglected in a deplorable manner. Places should be prepared at once and orders given to ensure this result under the shortest time possible.

The next work to be carried out is the erection of a proper and convenient building, to afford the stonecutters' department a sufficient shelter against the inclemencies of the weather and in the same time carrying on their work in any season of the year, without prejudice to the sanitary conditions required for the protection of their health.

Some other minor works are also indispensable. The quarry should be drained without delay, in order to have no stops in the carrying on of its exploitation. Many times in the year the works have to be suspended on account of the flooding of the quarry. This drain will in the same time be of an immense advantage to the farm, in according an excellent occasion to improve it by a complete system of drainage.

In order to give the head of the farming department the opportunity of raising a large number of pigs, and to supply thereby the steward's department with a larger quantity of meat, the temporary addition of pens should be made to the piggery.

National Prison Congress.—Through the kind permission of the Honourable Minister of Justice, I have attended, on September last (23-27) at the Congress of Penitentiaries of the United States, at Hartford, Conn. The convention, considering its work and conclusion, has been extraordinary important. Eminent men, who I may say devote their lives in the study of penal questions in the United States, were nearly all present, and the greatest unanimity has not ceased to reign in all the proceedings. I had the pleasure to make the acquaintance of Frank B. Sanborn, Fred. Wines, A. L. Hart, N. F. Boucher, of North Dakota, Warren Spaulding, of Boston, Bates, of Elmira, N.Y., &c.

The subjects treated by the convention were: 1st. The moral reform of convicts; 2nd. Punishments to prisoners; 3rd. Employments of convicts; 4th. Prison labour; 5th. Indeterminate sentences; 6th. Discharge prisoners; 7th. Treatment of criminals; 8th. Prison discipline. Every subject was treated with a science and devotion to the study of penal matters worthy of general admiration.

The study of penology has wonderful and constant disciples in the United States, and I have to lay before the National Prison Congress my tribute of thankfulness for my happy participation in their proceedings. The wardens of the penitentiaries of Canada should have, in the course of time, an opportunity to meet the American Association on their own soil, and I respectfully call the attention of the Honourable Minister of Justice to my proposal.

I have the honour to be, sir,
Your humble servant,

J. A. DUCHESNEAU,
Warden.

APPENDIX TO WARDEN'S REPORT.

Memo. for the Warden:

SIR,—I have the honour to submit my annual report of the various works for the fiscal year ended June 30, 1900.

Contagious Hospital.—Since the date of my last annual report this work has been completed and the hospital occupied by the ordinary patients during alterations and repairs to the general hospital.

Protestant Chapel.—At the date of my last report this work was also in progress, it was immediately afterwards finished and occupied, thus allowing the improvements to the general hospital to proceed.

New Stable.—Exterior work all completed in October last; during the winter months the interior work was carried on. The stable is now occupied though not entirely finished. The carriage washing room, first floor, doors and stairs from ground to first floor have yet to be completed.

New Lodge.—Work was resumed on this building on the 1st of May, and will be continued during the season, as long as the weather permits.

Front Road Grading.—I referred to this work in my last report from which date the work was continued until the season for outside work of this nature closed. The road proper has all been excavated, a small revetment wall of cut stone built on the north side, and a new sidewalk laid, replacing the old one torn up to excavate, the road received a light coat of macadam in the spring. This is considered sufficient until such times as the grading of the ground in front of the new lodge and the main building can be done, when it will be necessary to level the road in a few places and properly macadamise.

West Gate.—Strengthened by putting on steel plates on the outside of each set of gates. Sashes placed in the transoms over gateways, preventing drifting of snow and rain into the passage, and making the interior cleaner and more comfortable for the officers.

Temporary Sewerage Works.—Commenced in the end of April and continued since. The excavation for the main pipe, building of duct under the tramway and formation of man holes has been completed as far as the line of railway, and the pipe is now being laid. As soon as the pipes are connected through culvert under the railway line, the formation of the sewage beds will be proceeded with. The sewage will be diverted from the old system during the summer.

Brick Making.—A quantity of clay was taken out during the months of February and March, but the severity of the season prevented a sufficient quantity being taken out to make bricks this summer. This, coupled with the state of the machinery which was damaged in removing the old yard, prevented the work going on during the fall of the present season. It is hoped that everything can be got ready for making a large quantity of bricks next season, every effort will be made to do so.

Excavation in Yard.—During the latter part of the season of 1899, excavation was made for a pipe duct from the boiler room under shop building to new stable. Work will be resumed as soon as the water is low enough to permit of it, and duct built of cut stone. Steam and water pipes laid from boiler house to stable.

Piggery.—Floors in passages repaired; pens inside and outside divided, giving more space, and additional temporary pens erected for summer use.

Stores.—A vacant room on the ground floor of the shop building has been fitted for the use of the storekeeper, enabling him to keep his supplies in stock, and delivering to the various departments in smaller quantities.

Store for Chief Keeper.—A room in the basement of the main building has been fitted up for the use of the chief keeper for keeping convicts' effects.

Hospital.—The extension and improvements to the general hospital have been carried on during the winter. The removal of the Protestant chapel allowed the addition of a day room to the hospital. Hardwood floors have been laid in both compartments, walls and ceilings cleaned, plastered and painted. Ceiling ventilators connecting with cupola put in, glass doors and polished steel barriers set up in all openings, new bedsteads and mattresses added. The hospital is now re-occupied and found to meet all requirements of the department. The work of providing a separate office for the surgeon and repairs to the surgery is going on, and will be completed within a short time.

Breakwater.—The pier at the waterworks was found in a bad state of repair after the ice disappeared in the spring of 1899, it received a thorough repairing in August of the same year.

Pump House.—The old stone chimney removed. Stone arch over boiler taken down. Walls repaired and roof painted.

SESSIONAL PAPER No. 34

Warden's House.—Roof painted, fences repaired, and the walks gravelled.

Dome and Wings.—All the passages of dome and wings have been painted, galleries oiled, iron railings and pipes given a coat of japan, and radiators painted.

Painting.—Keepers' hall, kitchen, change room, shoe and tailor shop and shop vestibule have all been cleaned and whitewashed where required, and wainscotting and woodwork painted.

Protestant Chaplain's Old House.—This old building in an advanced state of decay was condemned and pulled down in March last.

Quarry.—The two derricks at quarry have been examined, repaired and painted, and a new derrick added, making three in all, with the addition of steel wire cables instead of chains.

Stone Shed.—The derricks at the stonecutters' shop have been repaired, new booms and masts replacing old ones.

Internal Telephone.—The deputy warden's office, west gate, farm barn and quarry have been connected by telephone with the messengers' hall, main building. The switchboard being in charge of the messenger ensures the presence of an officer at all times to give immediate attention to calls. In addition to what has been enumerated, a large amount of general repairs and smaller works has been done during the year. All branches of industry, including tailoring, shoemaking, tinsmithing and blacksmiths, &c., have been fully supplied with work during the year.

GEO. A. PRATT,
Chief Trade Instructor.

DORCHESTER PENITENTIARY.

DORCHESTER, N.B., July 31, 1900.

SIR,—I have the honour to submit my first report, accompanied by the usual financial, statistical and other statements from the several departments of the Dorchester Penitentiary, for the fiscal year ended June 30, 1900.

The appropriation for expenditure during the year was \$53,900, and the total expenditure amounted to \$53,860.05.

The per capita cost was \$236.51, as compared with \$205.24 for the previous year. This increase is mainly in consequence of gratuities, amounting to \$4,795.28 having been paid to four officers who were retired from the service. Another element tending to increase the per capita cost over the previous year, was the fact that the daily average of the prison population dropped from 234 in 1898-99 to a fraction over 219 for the year just ended.

The following tabular statement shows the movements of convicts during the year :—

	Males.	Females.	Total.
Remaining on June 30, 1899.....	222	4	226
<i>Received since :—</i>			
From common jails.....	78	2	80
From military prison.....	1	0	1
	<hr/> 301	<hr/> 6	<hr/> 307

Discharged since :—

	Males.		
By expiration of sentence.....	59		
Pardon.....	15		
Ticket of leave.....	20		
Death.....	5		
Sent to Kingston.....	4	103	103
		<hr/>	<hr/>
Remaining on June 30, 1900.....		198	204

showing a total of 204 prisoners, a decrease of 22 since June 30, 1899.

There seems to be a marked improvement in the conduct of prisoners as compared with former years, as there were fewer convicts punished and there was but one attempt to escape. With few exceptions, the conduct of prisoners has been exceptionally good and their health excellent.

The farming operations of the year were very successful : hay, grain and vegetables were far above the average. About three acres of unbroken land were brought under cultivation. The cultivated lands are being well tilled and are becoming more productive from year to year. This necessitates the immediate erection of a large barn for housing stock and storing hay and grain. The present barns are entirely inadequate, one of which, the sheep barn, is low in the posts and has a limited capacity for holding hay and grain. Last year there were some sixty tons of hay and grain in stacks. This is not as it should be, as it occasions much waste and loss. The sheep barn could be utilized for sheltering carts, wagons, sleds and other farm implements which are now exposed to the weather at all seasons for want of a building, a condition of things that would not be tolerated for a single season by any thrifty farmer in the country. I hope, therefore, to have your authority to build a suitable barn during the ensuing season.

Bakery.—A building for an additional oven was erected, and the oven is well on to completion. As there was no immediate necessity for this oven, work upon it was suspended to attend to more urgent needs. The old one is giving good satisfaction and is ample for present necessities.

New Stonecutters' Shop.—The foundation of this building, which is of stone, one story high, 137x45 feet, running nearly parallel with the east side of the prison yard wooden stockade, was excavated and the walls commenced last fall. Operations closed on approach of winter. The work was resumed on opening of spring and is being vigorously prosecuted. It will be ready for occupation by the end of the year. This building is intended for convicts preparing stone in winter and stormy weather, for proposed stone workshops and boundary wall of prison yard, which must be commenced at once, as the wooden stockade enclosing the yard cannot much longer be depended upon for safety.

Reservoir.—A new stone reservoir was constructed adjoining the wooden reservoir north of the prison, but, owing to some defect, would not at first retain water. In order to remove the defect if possible, an additional coat of cement, thought to be sufficient, was applied to the bottom. It leaked still, however, when it was again dried off and another coat of cement applied, this time it is not known with what result, as the water has not yet been let in, but there is every hope that the result will be satisfactory.

Tailors' and Shoemakers' Shops.—The upper story of the mill building was fitted up for a tailors' and shoemakers' shop, and these trades are now carried on there, having been removed from their former cramped rooms on the north side of the yard. Here there is more room and better facilities for effective supervision. A new tailors' furnace was put in this room.

Kitchen.—No improvement has been made in the kitchen. The same antiquated system continues, and the same cooking apparatus, except that a new range has been installed for the officers' mess. It is hoped that during the winter a new and proved system will be provided.

SESSIONAL PAPER No. 34

Laundry and Bathing.—The bathing and washing facilities are antiquated and almost useless. Steps are being taken to have installed this autumn modern and up to date apparatus.

Railway Siding.—Considerable work has been done on this siding, which is well advanced towards completion. Work was discontinued on account of wet weather and the nature of the soil. The culvert will be built and the siding finished during dry weather in summer.

Employment of Convicts.—The building of the new stone workshops and the preparation of stone for the contemplated stone prison yard wall gave employment to a large number of convicts, and in connection with this, the regrading of the prison yard, east of the dormitory, to the depth of some three feet, to bring it in conformity to the ground floor level of the new stone shops, employment is assured to all the prisoners able to work, who can be spared from the farm and workshops, for many years to come, as well as to a large number of teams. I presume your approval was obtained before the work was begun.

My thanks are due to the officers of the staff for their unvarying kindness and courtesy towards me since assuming the duties of my office, and for their willing assistance in maintaining the discipline of the prison.

I have the honor to be, sir,
Your obedient servant,

J. A. KIRK,
Warden.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

MANITOBA PENITENTIARY.

STONY MOUNTAIN, MAN., July 31, 1900.

SIR,—I have the honour to submit herewith reports and statistics in connection with the Manitoba Penitentiary.

The movements of convicts during the year were as follows :—

Remaining at midnight, June 30, 1899	112	
Received since	32	
		144
Discharged by expiration of sentence	16	
“ pardon	8	
“ license	2	
Transferred to Kingston Penitentiary	12	
		38
Remaining at midnight, June 30, 1900		106

The daily average during the year was 111·6, as against 102·7 in the previous year. The conduct and industry of the convicts during the year, with few exceptions, has been good.

Besides the usual reports, I attach a short report as to the progress of works, from Chief Instructor E. J. Adams, of Kingston Penitentiary.

I have the honour to be, sir,
Your obedient servant,

A. G. IRVINE,
Warden.

APPENDIX.

Memo. for the Warden.

I have the honour to submit a short report as to the progress of works at Manitoba Penitentiary for the fiscal year ended June 30, 1900.

Main Prison Building.—The recovering of the roof of this building with galvanized iron is about completed, very little remains to be done. All visible portions of the wood work have been covered with iron, making the roof fire proof from the outside.

Laundry Building Reconstruction.—Considerable work has been performed—brick in places renewed, more substantial barriers placed to all window openings, wood work of roof is well advanced, galvanized iron roofing is being prepared. Fair progress has been made on this building for the last two months, and if continued the building should be ready for occupancy about the first of January, next.

Slaughter House.—This building has been constructed adjoining the piggery, size 20 by 25 feet, one and one-half stories high, brick walls, roof covered with galvanized iron shingles, ground floor of cement, with deep gutters in same leading to six-inch trap, necessary apparatus has been set up for the dressing of hogs and cattle, a deep well has been sunk and provided with a pump.

Basement of Prison.—The wooden floors in basement have been removed and cement floors substituted, the wood floors were rotten, unsafe, and unsanitary. The wood stairs from basement to main hall have also been removed and replaced with cement steps laid on brick foundation.

Boundary Wall.—Fair progress has been made on this work, a large gang of masons and stonecutters being constantly engaged.

Condition of the Buildings, Officers' Quarters.—I find that most of these buildings are in need of repairs. I am informed that they have had very few repairs or paint since 1886, when they were built. The roofs in nearly all the houses will require reshingling and matched sheeting; the exterior wood work of houses and sheds needs at least two coats of paint; the foundation walls are built on the natural rock, no excavation, this allows the cold air to come up through the seams; by plastering the inside of walls and filling in area inclosed by the walls with debris, this fault would be remedied.

Hospital.—The roof of this building which is covered with wood shingles, leaks badly, and has been patched frequently; should be covered with metallic shingles as soon as possible.

Warden's Protestant Chaplain's and Deputy Warden's Quarters.—These quarters are in fair condition, except in a few places in warden's quarters; the kitchen requires a new floor; and new steps to front entrance are needed.

Prison.—The galleries of the ranges, which are of wood, should be renewed, as they are much worn.

E. J. ADAMS,
Chief Trade Instructor of Kingston Penitentiary.

JULY 23, 1900.

BRITISH COLUMBIA PENITENTIARY.

NEW WESTMINSTER, B.C., August 24, 1900.

SIR,—I have the honour to submit my annual report, accompanied by usual statistical and financial statements for the year 1899-1900.

The appropriation for this institution for the year was \$47,700, of which we expended \$40,583.18, returning to the Government the sum of \$7,116.82.

In comparing an institution of this size with larger institutions, as to per capita cost, it should not be forgotten that living here costs much higher than at any other penitentiary in Canada, also that we have a staff here equal to the handling of three hundred convicts in a modern constructed prison with a stonewall inclosing the premises.

If permitted to enter into the manufacturing of some Government necessity, say military clothing or mail bags, it would greatly reduce our cost.

The repairs to the penitentiary have been well kept up during the past year, which further increases the per capita cost; we also suffered the misfortune of having about half of a mile of our twelve-foot fence blown down, also the greater part of our prison roof taken off in a severe wind storm last fall.

The water supply has proven satisfactory, but it will be necessary to purchase a much larger pump for the work.

I was favoured with a visit from the Minister of Justice last October, although the time at his disposal was limited, he visited every department and granted interviews to all officers and convicts who desired to speak with him.

I hope by next year to report on the progress of our new addition for cell accommodation, as Architect Adams has been promised to visit us and report on the matter.

By an agreement made by the civic authorities and the Minister when he was here, we have carried out our instructions to macadam all Columbia street in front of our premises, with broken stone taken from our ravine, the city supplying rock-crusher, engineer, and feeder, we supplying the balance of labour necessary. I am pleased to say that an excellent road has been constructed which makes it possible to open the windows of residences in the vicinity without clouds of dust covering everything within. We have also widened the road in front of the gate by building some cribbing.

The following tabular statement shows the movement of convicts during the year just closed :—

	Male.	Fem.	Ttl.	Male.	Fem.	Ttl.
Remaining at midnight June 30, 1899..	90	90			
<i>Received since :—</i>

Returned to provincial jail.....	1	0	1			
	<hr/>			35	1	36
Remaining at end of year.....				103	1	104

64 VICTORIA, A. 1901

By your permission I purchased sixty volumes of 'Histories of all the Nations of the World,' for the general library. I trust you will grant authority to purchase more books of a lighter nature to make the library more attractive and readable.

I also intend to take down the walls between the two chapels and bring them into one, as both chapels were too small and not sufficiently ventilated for hot weather ; by this means more room and better ventilation will be given and in the event of constructing a new chapel, this can be turned into a school-room, which both for size and convenience, will be much better than the present one.

All the officers have been faithful in the discharge of their duties ; discipline of the prison has been well maintained during the year ; we have had one death, a Chinaman, by suicide, and no escapes.

Again regretting that I have not been favoured with a visit from you this year,

I have the honour to be, sir,
Your obedient servant,

J. C. WHYTE,
Warden.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

APPENDIX B.

SURGEONS' REPORTS.

KINGSTON PENITENTIARY.

KINGSTON, Ont., July 27, 1900.

SIR,—In accordance with the requirements of the Justice Department, I herewith submit my annual report for the year ended June 30, 1900.

It has been said that the lessening of a crime of a country is an object worthy of the best thoughts and the best efforts of our best men. Notwithstanding all the attention the subject has received by those who have made it a study, it still remains one of the most perplexing of social problems in this and in every other country. Goethe once remarked, that if you want to improve men you must begin by assuming that they are a little better than what they appear to be. Any scheme so far advanced for the abolition of crime, or the improvement of recalcitrant man, is yet, I fear, in the region of dreamland. Investigations for the solution of this vexed question would require to be carried on along entirely different lines of research from that which have hitherto been pursued. Crime, to a large extent, is a psychological manifestation, in which heredity plays an important part. The virus of pregenital criminalism, degeneracy and disease being in the blood, one has to look backward to its cause. In the majority of prisoners, therefore, it would be as difficult to effect a reformation in their criminal inclinations, as it would be to remove the impurities of a stream by filtration of the water, below the source of its contamination.

In making these few prefatory remarks, I have done so in order to give an idea of the peculiar mental and physical organization of a large number of the prison population.

The prison during the year has been absolutely free from any epidemics, which in a great measure was due to the perfect sanitary condition, the absolute cleanliness of the cells, wings and other parts, which, in order more securely to guard against disease, have all been thoroughly renovated. Due regard has been given the subject of ventilation in the various departments and there have been no complaints on this subject. I am, however, convinced of the necessity of the introduction of some better system in the wings and cells. Now that the new electric plant is assured, the subject might be considered.

The sewage system has been operated in a most satisfactory manner. These quarters have been kept clean and free from offensive odours, and the filtering beds receive that care and attention which are necessary for keeping them in working order. The engine room has been whitewashed and thoroughly renovated, the adjoining rooms are kept clean, and the other parts give evidence of having received ample attention. A full supply of disinfectants is constantly at the disposal of the overseer, who uses them with good judgment. The disposal of sewage here is far ahead of anything of the kind in any public institution in Canada.

It is scarcely necessary for me to refer to the entire satisfaction given in the heating arrangements of the prison. In my visitations to the various departments during the cold season there has always been the same uniform temperature prevailing. To many prisoners who, when free, scarcely know what heat and comfort mean in the winter season, such a place is a boon. The engine rooms are clean and in a sanitary condition and everything looks bright and clean.

Next to air, water is the most important of all substances necessary for human life. The water used for drinking purposes has been entirely free from all deleterious substances during the past year. Chemical examinations made by me several times during the year failed to reveal any organic or disease-producing substances. It is perfectly clear, cool, free from odour or taste, well aerated, of a mild degree of hardness and is a good potable water. A polluted water may carry the organism of infectious diseases and produce epidemics of fever, cholera, dysentery and malaria. The large tanks used as receptacles for water used for other than drinking purposes have been wisely abolished,

and there is a direct connection made by pipes from the tower to the various portions of the prison.

In consideration of the large number who come to prison broken down in health and afflicted with disease, some of which might be classed as incurable, the standard of health maintained has been as good as in former years. There are at present in prison a large number, both young and old, whose constitutions are in a dire condition of bankruptcy. This is not from prison life; on the contrary, it is a matter of daily observation that the large majority entering prison in a depressed state of health improve under the influence of a more regular life and become physically rehabilitated. It is a noticeable fact that habitual offenders or recidivists, those without any trade or calling, form the largest contingent of those whose health require attention. Few artisans find their way to prison.

A change of employment occasionally is to be recommended for prisoners, with great advantage to their mental and physical condition, as a monotonous labour of any description, especially when there is no return for it, has a very depressing effect. The difficulties, however, surrounding any move in this direction are quite obvious to those acquainted with the routine of prison work.

The food supply has been of the best quality, abundant in quantity and served according to regulations. Any complaints regarding the quality and quantity of the food were, on investigation, found to be groundless. A good supply of vegetables was furnished during the year. The kitchen, kitchen utensils and dishes in this department are kept clean and bright and give evidence of careful management. The usual odour found in kitchens does not appear to prevail here to a large extent, as the regard paid to ventilation and sanitary matters prevents them from being much in evidence.

The west wing, with new and commodious cells, is being pushed rapidly towards completion, and when finished will be a great improvement, particularly as regards the cells, which have many things to commend them. The ventilation is perfect and all the appointments are in accord with modern sanitation. Valetudinarians and prisoners convalescent from acute or other diseases could with great advantage be recommended for cells in this portion of the prison.

The conditional liberation of prisoners now in operation has been so far successfully applied, but it yet remains to be seen whether its adoption will be productive of salutary results. Certainly for those whose health cannot be said to be good, a curtailment of the original sentence, under the amendment, would be of great value.

As usual a large number of young men who have been brought to this country as waifs, find their way to prison. With no one to restrain them in the indulgence of their passions, or to develop their nobler and to curb their criminal instincts; with a bad heredity and a deserted condition without any emendatory influence, they soon develop vicious propensities and swell the ranks of the criminal class. To these I would say imprisonment is often unjust and liberty dangerous. A special educational or industrial school, or reformatory for first offenders of this class, would be in accord with modern philanthropy.

Your instructions regarding the examination of the police officers were carried out. In Italy applicants for the position must be young, erect, intelligent, quick, educated, and are obliged to go through a preparatory training school before they are considered qualified to take the position, as it is only in connection with the actual service that the desired qualifications can be obtained.

During the year a number of guards were invalided by disease contracted at their own homes, as in most instances the sanitary surroundings of their premises were not the best, and disease could be traced directly to this. Fortunately no deaths occurred amongst the officers.

In view of an epidemic of smallpox, I have, during the year, vaccinated every prisoner who did not show a mark of previous vaccination. The people have the confidence of the scientific principles embodied in the application of the vaccine virus today as when they were first transmitted to the world by the immortal Jenner over a century ago. Some of those vaccinated became very ill and were taken into hospital for care and treatment on the first intimation of their indisposition.

SESSIONAL PAPER No. 34

The practice of judges ordering flagellation as an addition to the regular sentence of penal servitude, should be abolished, unless it be specified that the ordeal be carried out in the county jail. In the prison the contemplation of that portion of the sentence frequently impairs the prisoner's health and undermines his constitution. After the infliction of the penalty prisoners frequently improve physically on account of being relieved of the mental strain.

As usual a contingent of men, many of whom are habitual offenders far advanced in years, are being sent to us. Having reached a stage when all the vital phenomena have almost fulfilled their evolution, they are unable to perform any work, and when not occupants of the hospital are constantly under medical care.

It is here worthy of remark that the health of prisoners who are bright, intelligent, and who possess some degree of education, is generally good, whilst a lack of education, which generally obtains amongst the criminal class, points not unfrequently to a depraved condition of health. It is believed by many that education does not diminish crime; in fact, there are those who believe that education given the prisoner makes him more dangerous. As a result of extensive observation and study, I am convinced that education does not increase crime, nor does culture engender it. Education serves to strengthen the character, promotes mental and physical health, and tends to conduct from devious paths and assists in remoulding men who have been imperfectly cast for citizenship. According to Plato the profoundest of Greek philosophers, 'Education is to place youth in happy circumstances in which no sights or sounds of evil, or allurements of passion, can hurt the character or vitiate the taste. They are to live in an atmosphere of truth, the breeze always wafting to them impressions of truth and goodness.'

The unreasonable delay in carrying into effect the sentences of our criminal courts necessitating the prisoners languishing in the county jails, which are, as a rule, damp, cold and poorly ventilated, for weeks and in some cases months, merits more than a passing notice. Many prisoners are brought to us, who attribute their impaired condition of health to the bad sanitary condition of these county institutions. Combined with this might be mentioned a lack of personal hygiene, which in some cases has been remarkable. Rheumatism, affections of the lungs, ears and eyes, are the most frequent diseases from this source.

The attempt to classify prisoners which has been made in certain American prisons, has not been so far successful. Whilst admitting the desirability of such a scheme I am convinced that no classification could be successful except one based on the mental, moral and physical characteristics of the prisoners. A plan approaching this basis would have a general healthful influence.

The hospital has been kept clean, well ventilated, lighted and heated. Every portion of it has undergone a thorough renovation and the painter's brush has given such touches as are in harmony with the surroundings. The floors have been waxed and polished, giving to the wards a very neat appearance. The cells in the hospital are bright, and the sick receive every care and attention. The orderlies are punctilious in carrying out instructions, and the attention bestowed upon the sick by them is fully recognized. The best quality of standard drugs with the most recent additions of reputable therapeutic effect, complete our medical armamentarium.

In consideration of the large number in prison, many of whom perform outside work in dangerous positions, no serious accident occurred during the year.

CRIMINAL ASYLUM.

This hospital for insane criminals is a necessary adjunct to the prison, where prisoners from the prison proper, manifesting symptoms of mental obtusity, or harbouring homicidal or other delusions, are committed for care and treatment. So soon as their mental health has been restored, they are discharged back again to the ordinary prison to resume their wonted employment.

The addition of the new cells to the general ward has greatly increased our facilities and will relieve us of any congestion which might occur.

The large day-room where the patients can amuse themselves when the weather does not permit of their going out in the yard, has been completely renovated and the wood-work painted.

The closets which are of the latest construction for asylum use, operate with ease, flush well, give every satisfaction, and are always found in a sanitary condition. The corridors and cells in the sleeping apartments have all been painted and are kept scrupulously clean. The patients maintain a uniform standard of good health, and there has been little sickness. The care of the sick here is carried out on the same lines as in our regular hospital. When required, faithful, intelligent, and competent orderlies who are taught to understand the principles of good nursing are always at our disposal, and are ever ready and willing to carry out instructions. In the ordinary lunatic asylums, female nurses are employed in a separate building only, to look after the quiet and harmless patients who become afflicted with some bodily ailments. Suitable employment is given those who are able and willing to work, a majority of them making themselves generally useful. Games of various kinds are indulged in, in the spacious day-room, and the large yard which is always in good order, offers ample opportunity for enjoyment and out door exercise. In the treatment, firmness is always combined with kindness, and one has always in view the removal of an affliction than which there is none which affects so keenly the finer sensibilities of our nature. As will be seen below eighteen patients have been completely restored to mental health, and thirteen have so far improved as to resume their ordinary employment in the prison proper.

The operation of the new law governing the admission of prisoners into the prison who are adjudged insane by the surgeon, is now in force. The law clearly states that if at any time within three months after the receipt at the penitentiary of any convict sentenced to imprisonment therein, it be reported by the surgeon to the Minister of Justice, that the said convict is insane, and was insane, at the time he was received at the penitentiary, instructions will be issued for the removal of the prisoner to the jail or other place of confinement from which such insane convict came to the penitentiary. This amendment to the Act is a wise provision, and I trust will be acted upon with commendable promptitude. One insane criminal has already been transferred to the Brockville asylum, and two others who were pronounced insane by me when they entered prison, await removal.

It must never be lost sight of that our insane criminals belong to a sanguinary class and require that care and disciplinary guardianship which could not elsewhere be accorded them, and being in a penal institution an escape of one of them would be a serious affair. Statutory enactment requires that every insane felon, that is, becoming insane during imprisonment, shall undergo his sentence of penal servitude and under the circumstances his mental condition shall not afford him a valid exculpatory plea.

The capricious views, in which there does not appear to exist a widespread community of opinion, as to the origin of crime being at evidence of some mental affliction, hinging on the theory that crime is so hideous, so revolting and so unnatural, that one must be devoid of all reason to commit it; are about as illogical as to aver that every lunatic is a criminal. Those who reason from this hypothesis have much to learn of criminality and insanity. Extensive observation however, has convinced me that many criminals and lunatics are closely allied and have many things in common, such as instability of certain passions, morbid excessive vanity, emotionality and exaggerated sense of the ego, making the borderland which divides them often illy and unsatisfactorily defined. There being no recognized standard of mental soundness it is difficult to designate the qualities which make up a sane mental organization, but so long as one can make his speech and actions conform to the general conception of sanity, his right to individual responsibility is not questioned. As amongst criminals so amongst the insane, there appears to be at certain times a profound psychical change which so completely overwhelms their mentality as to render them liable to commit violent acts, the accomplishment of which gives them relief, and dissipates the morbid impulse of a neurotic temperament. A few epileptics find their way to prison, and are soon admitted to our care. The well known tendency of this disease to weaken the mental faculties often lays the foundation for moral delinquency. It has been estimated that crime prevails in 11 per cent of epileptics.

SESSIONAL PAPER No. 34

It must not be forgotten that our insane are undergoing an expiatory sentence and no matter how absurd or wild their delusions, they are always able to appreciate this fact and often meditate on schemes for escape. Fortunately when the termination of their sentence arrives, with the exception of an occasional chronic case, they are restored to their usual mental health and are set at liberty. A chronic case, having no friends, is sent to one of the provincial asylums at the end of his sentence, according to the stipulated terms of agreement. If he is a dangerous and disturbed patient he is sent to Hamilton asylum where by an order in council a small criminal asylum known as 'East House,' has been erected for the reception and retention of insane criminals.

Dr. Xalabarder, Spain, in the course of his letter to the Minister of Justice, referred to my report on the criminal insane in Canada, in the following complimentary terms:— 'Will you also thank Dr. Daniel Phelan for me for the valuable information he has forwarded, and which will be of great service to me for the object I have in view. In a few lines he has given many important details, original thoughts, and useful observations, which prove how thoroughly he is acquainted with the subject on which he writes.'

The number of insane in our hospital at end of year was 38; admitted during the year, 31; admitted from the prison alone, 23; transferred to provincial asylum on expiration of sentence, 2; discharged cured, 18; improved to resume work, 13; received from St. Vincent de Paul Penitentiary, 2; from Dorchester, 3; from Manitoba, 3; transferred to county jail from which he came, according to amendment to Penitentiary Act, 1.

Prison of Isolation.—This portion of the prison has been kept in good order and is always neat and clean. The health of the prisoners has been good, sanitary arrangements perfect, heating and ventilation satisfactory. The food has been delivered with promptitude and there have been no complaints regarding either quantity or quality. Prisoners are released from here into the general prison in good physical condition. If there are any so disposed to lead a better life and become peace-abiding citizens they will have opportunities here for reflection and reformation. They are free from corrupting associations and vicious personal environment, and as a consequence improve in health. Old offenders, for whom the straight and narrow path has no attractions, are returned here with regularity.

Popular ignorance has confounded the 'solitary system' with the 'separate' or 'isolation' system as carried on here. The 'solitary' system consisted in shutting up unfortunate offenders in subterranean cells without light, books, exercise or employment, and as a consequence mental and physical disease was the result. The fictitious stories regarding the production of insanity by the separate or isolation system are not founded on facts and originated from the experiences of the solitary system. The prison of isolation is the best place as a safeguard to mental equipoise, and no case of insanity so far could be attributed to it.

Female Prison.—Owing to the expiration of the sentence of so many female offenders, and consequently their release from prison, only twelve remained in the wards at the end of the year. The health of the inmates was very good, no sickness of any consequence having occurred during the year. As usual the place is kept scrupulously clean, and in the cold season, warm and comfortable.

Prescriptions.—The number of prescriptions dispensed during the year, independent of hospital patients, amounted to:—For officers, 655; isolation ward, 741; hospital for insane, 237; females, 254; prescribed for males, 5,118; teeth extracted, 239; number of days in hospital, 4,702.

I desire to express my appreciation of the earnest coöperation I have received from the warden and the zeal and efficiency displayed in the discharge of his duties by Mr. Gunn, hospital overseer.

DANIEL PHELAN, M.D.,
Surgeon.

ST. VINCENT DE PAUL PENITENTIARY.

MEDICAL DEPARTMENT, August 1, 1900

SIR,—I have the honour to hand you my annual report for the year ended June 30 last.

On July 1, 1899, the penitentiary population was 447 ; on the first of July last it was 463, an increase of 16.

By an analysis of my journal I find that the number of cases treated by me has been 2,374, which is so enormous that I am again forced to declare that the health of the institution is far from satisfactory.

And like the last, this year shows that it is the alimentary canal which is chiefly the source of the trouble as the following figures will exhibit :—42 cases of anorexia, 34 cases of colic, 60 cases of dyspepsia, 101 cases of dysentery, 392 cases of diarrhœa, making a total of 629 cases of troubles of the digestive tube.

Diarrhœa is chronic in the institution and is quite independent of climatic conditions, since each month has furnished its proportion of the alarming total 392, viz. :—1899—July, 55 cases ; August, 49 ; September, 11 ; October, 21 ; November, 38 ; December, 29. 1900—January, 34 cases ; February, 36 ; March, 28 ; April 22 ; May, 34 ; June, 35 ; total, 392.

The adverse influence exercised by the troubles of the digestive canal over the economy of the convicts, will serve to explain the large number of cases of debility mentioned in the list of maladies treated, viz., 161, to which must be added the depressing effects of the penitentiary routine and the hard labour exacted from the convicts in certain departments, when the number of cases of palpitation of the heart (139) will cause less surprise.

Placed under such unfavourable conditions, I ought to have more liberal recourse than ever to milk, and it was to this end that, in my last report, I pointed out its utility ; also, with the same object the warden recommended its production by the institution, but you are deaf to our representations and, moreover, have made no sign.

One would think that the authorities of the St. Vincent de Paul Penitentiary have displeased you exceedingly.

In December, 1899, you were acting as warden here, and I presented to you the following report respecting the copper kitchen utensils employed in the preparation of the convicts' food :

ST. VINCENT DE PAUL PENITENTIARY, December 18, 1899.

To D. Stewart, Acting Warden :—

SIR,—The first time I saw the large boilers employed for the culinary operations of the penitentiary, I was struck with the idea of danger offered by the employment of such vessels to the health of the inmates.

The said boilers being of pure copper with their long pipes for the escape of steam, I was compelled to examine them and inquire if there had been some verdigris observed inside of the said boilers and pipes. I received the assurance that no verdigris had been observed and that these pipes were kept perfectly clean by the steam running through the said copper pipes. My fears for a good while remained silent, but in presence of the large number of diseases in the alimentary canal of the convicts, I lately pushed an investigation so far as to discover numerous warts of verdigris growing inside of the said copper pipes.

Copper does not change in dry air, but in moist air becomes covered with a green coat of carbonate, known as verdigris.

SESSIONAL PAPER No. 34

In the present case the large and long surface exposed to the moisture is under the most favourable circumstances for the production of the said carbonate of copper, a poisonous salt of powerful action on animals. The soluble salts of copper are no more corrosive when largely diluted, but their action is but irritating or inflaming. The carbonate of copper is one of the soluble salts of the metallic copper.

Experience teaches that copper becomes poisonous with time in small doses. In the present case, we are in presence of fractionally copper daily consumers.

The elimination of copper is slow, being operated by the mucous membrane of the alimentary canal, the salivary glands, the liver and the kidneys.

No wonder now that an immense surface of metallic copper being exposed to an easy production of verdigris, a soluble salt, becomes an active factor in the generation of a multitude of diseases in the alimentary canal of the convicts.

But every convict is not equally apt to become sick by copper ingestion ; it is of daily observation as for many other noxious substances.

The five large boilers actually in use are in bad order, being not coated with tin.

The present cooking system is a dangerous, manifestly a dangerous one.

And I terminate my report with a remark taken from p. 575 of Dispensatory of the United States :—

‘ Vessels of copper which are not coated with tin should not be used in pharmaceutical or culinary operations ; for, although the metal uncombined is inert, yet the risk is great that the vessels may be acted on and a poisonous salt formed.’

In faith of which I subscribe,

DR. L. A. FORTIER.

And what has been done? The parts of the boilers most accessible to soap and brush have been tinned, but the most dangerous part, the inside of the tube, continues to produce verdigris every day in the year and poison the food intended for the prisoners, and the interior of the immense funnel running horizontally under the platform of the kitchen offers 150 superficial feet of metallic copper, exposed to conditions the most favourable for the production of a poison which is soluble and transmissible into the boilers by the condensed steam.

I ask in the name of humanity that this copper funnel may be removed without further delay.

KNIVES AND FORKS.

In speaking of maladies of the alimentary canal, I must say a word, in passing respecting the utensils employed in the civilized world for table purposes. Knives forks and spoons have been in use for ages in the new and old world.

The inhabitants of Turkey and China substitute chop sticks for forks, but at the penitentiary of St. Vincent de Paul, in a civilized country, the use of a knife and a fork has been forbidden for some years.

The convicts have nothing but a spoon to assist them at their meals, and, in dealing with their rations of beef and pork served out to them, they must, perforce, make use of their fingers. This is a great hardship, especially to those who have bad teeth or none at all.

The mastication of food, always of great assistance in the work of digestion, receives no aid from the knife, which is undoubtedly of great value in properly dividing the said rations of beef and pork, and which, when taken into the system in an insufficiently divided state, cause trouble to the organism.

The irritating suppression of the knives and forks, for which you are responsible, is a mischievous innovation and a wound to the self-respect of the convicts who find themselves placed on a footing with the brute. The unfortunate prisoner eats and grinds his teeth while nourishing sentiments of revenge against society.

You have been very cruel in refusing me the use of the knives and forks to a convict totally without teeth and in meeting my request with an impracticable suggestion.

HOSPITAL.

At last our old hospital has been repaired and improved and has been at the service of the sick since the middle of May. Thanks.

HOSPITAL OF ISOLATION.

This hospital for the treatment of contagious diseases has been open since last year ; it is provided with a water closet and bath, modern style.

STONE CUTTERS' SHED.

In December last I presented the following report :—

SIR, — The first visit I made in the yard of this penitentiary, I remarked and considered the stone shed as a wreck, and a report was made accordingly.

The warden, J. A. Duchesneau, in his last report says :—‘In the yard there is a large wooden building called the stone shed, being used to shelter the stone cutters. This shed is in such a ruinous condition that its immediate reconstruction should be ordered on the same plan as that of the workshop of the Kingston penitentiary.’ And yet there is nothing done, nothing ordered even. Not only the shed is improper to the purpose for which it is occupied, but the closets were and are a source of great annoyance to the workers. The horses and pigs belonging to the Government are receiving from you a better treatment than the working convicts gathered under the said shed. It is a sinful neglect, a wilful cruelty inflicted to unfortunate men suffering many moral tortures besides the ferocious bites of our climate.

In faith of which I subscribe,

DR. L. A. FORTIER.

You made a small attempt at the time to improve the retrees. You have not succeeded ; it is more repulsive than ever.

The Penitentiary Act, art. 12, says, however :—‘The Inspector, under direction from the Minister of Justice, shall visit, examine and report to him upon the state and management of all the penitentiaries. And all suggestions which the wardens thereof make for the improvement of such penitentiaries.’

What consideration is given to the reports of the warden and physician of the St. Vincent de Paul Penitentiary ? None. You remain deaf and do not report upon matters complained of. The 17th art. goes further :—‘If the inspector finds, at any time, that the penitentiary is out of repair, or does not possess the proper and requisite sanitary arrangements, has become unsafe or unfit for the confinement of prisoners, or that the same does not afford sufficient space or room for the number of prisoners confined therein, or the requisite amount of shop and yard space for the proper industrial employment of the prisoners, he shall, forthwith, report the same to the Minister of Justice, and, at the same time, shall furnish a copy of such report for the Minister of Public Works.’

You have, often times, seen the shed alluded to, for stone dressing ; you have received my report calling your attention to the necessity of its reconstruction, to the unsanitary state of its easements and you turn a deaf ear and do not make any reports.

Your example is calculated to bring about a great contempt for the laws of our country ; one would think that you tremble to do anything for Quebec.

BALCONY.

In my last year's report, it was asked :—‘Why a balcony ?’ To permit the patients, in hospital, to breathe the fresh air of the exterior and to profit by the rays of the sun

SESSIONAL PAPER No. 34

Air and light are the agents of the medicative strength of nature ; those agents of strength acting quietly, promptly and in a perfect manner. Summer is the propitious season for the treatment of chronic diseases and also to lay up a reserve of vitality for winter. The humours of the human body running freely through their proper channels, nutrition is improved and the injurious products are more easily expelled. Speaking of the light of the sun as a therapeutic agent, I do not mean you to understand that patients should be exposed to the burning and enervating rays of the sun. No.

I add to-day that modern science, supported by experience, teaches that tuberculosis is curable by the air cure and rest, and for this purpose sanatoria are erected in Europe and America to fight that terrible tuberculosis by the aerotherapeutic treatment. We have consumptives who linger the whole year round in the cells of the penitentiary; let us come to their rescue by such means as would secure them a truce while waiting for their discharge.

At all events a balcony would be an important help in case of fire. You are aware that the hospital is not fire proof, as the cells are, and should a fire occur when the prisoners are locked up they would inevitably be burned to death. Are you going to turn a deaf ear to this humane suggestion?

Insane.—On the 3rd January last convicts Pierre Godin and Napoléon Dufresne left this penitentiary for the asylum at Kingston.

For your information I may say that the idiot dwarf Oscar Gagné, sent here by the magistrate from Three Rivers, is now confined in the asylum at Beauport. Your negative attitude in this matter is and always will be inexplicable to me.

Night Service.—In December last you introduced into the service a pernicious innovation in condemning seven officers of the penitentiary to permanent night duty, during which they were unable to obtain a wink of sleep and could not be relieved for any purpose. A crust at midnight was all the refreshment they could procure, and at half-past six in the morning they left to go to their beds, necessarily without proper sustenance in most cases, and to sleep, as best they might, during the noises of the day, the traffic, and disturbances incidental to a household where there are children. These officers were unable to procure more than one good meal per day before returning to their duties.

In January last you requested me to furnish a report as to the health of the employees of the penitentiary, and I gladly complied with your request because it afforded me an opportunity to express openly my opinion of the obnoxious innovation referred to. After four months' experience the warden, influenced by the reports of his deputy and the medical officer, has deemed it his duty to abolish the new regulation.

Subsequently, on June 15, you wrote to the warden complaining of the change made and taking exception to my attitude in the matter.

Speaking of the officers affected by the regulation, you say: 'When the change was made it appears that four of the 'invalids' were relegated to the towers, where they were exposed to the inclement weather of that season more than they would in any other position. I cannot find a protest from the surgeon on this point, although it is quite as much within his duty as was his persistent interference with the night staff system.'

I have maintained my attitude to the Department of Justice as follows: 'I did not protest against the relegation of the aforesaid four invalids to the towers because I was happy to see them engaged in a duty securing to each of them a relative rest of body and the faculty of drinking plenty pure and fresh air, and I am to-day amply rewarded by the manifest improvement of their general health, previously broken down by a long night duty, exposed, during whole nights, to the inclemency of fall and winter weather, without having the latitude of warming their trembling limbs at the stove, banished from the yard by his cruel order. The inspector is not welcome to criticise my conduct in the performance of my official duties, for his incompetency and his heinous sentiments against me are clouding his sight when he meets me on duty. Let him be assured that as long as the sanitary interest of the officials and inmates of this institution are being committed to my solicitude I will never fail to my task, and will never allow him the occasion of spoiling the health of any of them by his arbitrary edicts. I

will not even permit him to frame an interpretation of the least hygienic fact, because his intellect is being distorted by malignancy, bad faith and pretension. He is completely incompetent from any point of view, and I find him ridiculous while putting 'invalids' between turned commas.'

I am an 'invalid' protector, and the inspector is an 'invalid' generator.

Further on you tell the warden that the officers on night duty have been prompted by me to plead ill health with the object of interfering with your system, and with threats, great threats, you say that I am meddling with a matter that does not concern me. Pardon me, sir—being officially obliged to treat gratuitously all the employees of the penitentiary, it is certainly a part of my duty to protect them from all causes of sickness, and this is my reason for combatting your tyrannical regulation. I have advised the officers employed on permanent night duty to memorialize the Minister of Justice to ameliorate their position. They are afraid of you, and have not taken my advice. The right to petition is the most sacred right of every British subject.

Drugs Furnished to Employees.—This is a bagatelle, and I must say that I have kept no account of these, having furnished them myself, for the most part, to save myself the trouble of going to the penitentiary pharmacy, but I would accept with pleasure the use of a horse to enable me to visit the employees when they are sick, and you know yourself that they are far from being in the immediate neighbourhood of the institution.

ACCIDENTS.

Date.	Names.	Accidents.	Remarks.
1899.			
Sept. 29..	William Bath, alias Browning.	Fell down a scaffolding through his own imprudence.	The coroner's inquest exonerates the institution from all blame.
Dec. 28..	John Peebles	Thumb cut off by circular saw.	
1900.			
Jan. 4..	Joseph Morrissette.....	Dislocation of the wrist through a fall.	Imprudence of the party.
Mar. 28..	Joseph Labrie	Left foot bruised by a stone while working. His big toe lost one of its phalanges through necrosis.	

DIED.

1899 September 29.—William Bath, alias Browning, accidentally killed by falling. Inquest exonerated the institution from all blame.

1900, February 16.—Regis Blanchette, died of pulmonary tuberculosis; 155 days in hospital.

1900, April 27.—Theophile Boutin, intestinal tuberculosis following typhoid fever; 163 days in hospital.

During the year just closed 78 patients have received hospital treatment, these 78 patients were visited 1,695 times. 7,976 consultations were held outside of the hospital, making a total of 9,671 consultations for the year.

SESSIONAL PAPER No. 34

Lastly, during the twelve months I have made 55 reports in triplicate.

I am requested to furnish a report on the drugs dispensed during the year.

The request appears to me to be a very strange one.

I have nothing whatever to do with the purchasing of the drugs. I have no official relation with the firm that holds the contract for the supply of drugs to this institution. I am not furnished with a list of such drugs, and, in the absence of such list, I cannot, by deducting the stock in my pharmacy, furnish the information you require.

Before closing I wish to remark, as Dr. W. H. DeWolf Smith of the Penitentiary of British Columbia did last year, that a free vacation being granted to the staff of all the penitentiaries, why should not the medical officers be permitted to enjoy a like privilege, without being called upon to pay for a *locum tenens*?

And now I have the pleasure to unreservedly thank all the officers of the institution for their kindness towards me. It is very true that two former employees of the penitentiary have sought to embarrass me in the exercise of my duties. In their intemperate zeal they have accused me of abuse in the use of morphine, but the accusation is not worthy of my notice, since I suspect it would not have been made but to give you pleasure. Please do not put yourself to any trouble on the question of opium and its derivative. Morphine, the active principle of opium, possesses the confidence of the scientific world. Do not stir up the mud of popular prejudice. Morphine will see the envious crowd of pharmaceutical preparations that would vain supplant it, pass away and will remain, (like the Pyramids of Egypt,) through the ages a guardian angel of suffering humanity in the penitentiary as elsewhere. I sincerely hope that you may never be under the necessity of testing its magical power.

Dr. L. A. FORTIER.

D. STEWART, Esq.

D. O'SHEA,
Hospital Overseer.

DORCHESTER PENITENTIARY.

DORCHESTER, N.B., July 24, 1900.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1900,

The sanitary condition of the prison is all that could be expected from its healthy site and proper construction. The general health is largely promoted by the scrupulous

cleanliness that prevails. The whole inside of the prison is whitewashed twice a year ; the cells once in three months and more frequently, if necessary. They are scrubbed once a week, each wing being swept, dusted, the windows opened and the different corridors thoroughly ventilated every morning. The sewerage system continues to work very well. A portion of the wooden pipe, required to be repaired last season, which had become rotted and threatened to fall in. At present it is giving every satisfaction. The water supply is abundant for all the prison purposes, as well as the officers' cottages and the large stock on the farm. It is of the very best quality.

The food furnished is of good quality, well cooked and supplied to the convicts in ample quantity. I consider the dietary of this prison exceeds that of the average farmer in this country, and is much better than our honest labouring man is able to furnish to his family.

Since last report the tailor and shoemaker shops have been abandoned and a very good shop fitted up in the upper flat of the mill, formerly used as a carpenter shop. This is a decided improvement and much more healthy than the old ones.

The new stonecutters' shop now under construction, and which we hope to have completed this season, will be a great addition to the institution in a sanitary and financial point of view. It will afford accommodation for seventy five stonecutters and stone-breakers, during the winter season at profitable employment, that would otherwise be in their cells, or, if working, it would be at some employment that is generally entirely unproductive.

The old bath-room, used by the men for many years, is now in a delapidated condition : tubs worn out and leaking and the wooden building much out of repair. A new bath-room and wash-house is an urgent necessity, for which, I am happy to say, all preparations are now made by the architect and will be completed as soon as possible, when we will have twelve shower baths of modern construction, instead of the antiquated and now obsolete tubs we have used for twenty years.

The number of prisoners admitted was seventy-nine males and two females. The lads of sixteen and under were five ; twenty and over sixteen, twenty-three ; thirty and under, twenty-six ; forty and under, fifteen ; fifty and under, seven ; sixty and under, four ; above sixty, one. In those were one blind man and one deaf and dumb. The percentage of lads is less than last year, although we still continue to receive a number of boys that should be sent to a reformatory instead of to a penitentiary. The physical condition of the men admitted has been generally better than last year,—fewer of the semi-idiotic class. A considerable number of men were received suffering from venereal diseases, some of them of a very aggravated form, requiring prompt and long-continued treatment.

Of the eighty-one admitted, there were found to be thirty-six that required to be vaccinated. These either had no mark of vaccination or marks of doubtful protective character. In every one of these cases they were successfully vaccinated. In the majority of these cases the men came from cities or large towns, where you would naturally think the facilities for having the operation done were greater than in the country districts.

The general health of the prisoners was better than last year. There have been during the winter a number of somewhat severe cases of bronchial affections ; not so many attacked with diarrhoea or dysentrey, and, fortunately, none of them were bad cases.

We have had no serious accidents, and I am thankful to say, have not been visited by any contagious or epidemic disease.

Three insane men have been transferred to Kingston, where proper facilities exist for the more successful treatment of this class.

During the month of January last I examined the police officers of the staff and forwarded to you a report on their physical condition.

Five deaths occurred in the prison during the year—one from dropsy, two from nephritis, one from paralysis, and one from tuberculosis.

The number of men admitted to hospital was forty ; the number of days in hospital was 2,136 ; the number of prescriptions to men not in hospital was 6,721 ; to females, 195 ; to officers, 134.

ROBERT MITCHELL, M.D.,
Surgeon.

STONY MOUNTAIN, July 24, 1900.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1900.

The health of the convicts, in general, during the year has been fairly good.

Last April, convict No. 89 received a very severe injury to elbow joint.

The hospital overseer, Mr. Beaupré, is always attentive to his duties. I fully appreciate his assistance.

I have the honour to be, sir,
Your obedient servant,

RODERICK MACDONALD, M.D.,
Surgeon.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

APPENDIX C

CHAPLAINS' REPORTS

KINGSTON PENITENTIARY.

June 30, 1900.

SIR,—I have the honour to present my annual report for 1900.

The usual duties have been duly performed. The visits to hospital patients have been largely in excess of last year, amounting to 1,912. There were ten deaths among those under my charge.

It sometimes, though rarely, happens that a discharged convict is arrested and tried on a charge which occurred prior to his first conviction and was known at his trial, though not placed in the count. The effect of such punishment is to foster a feeling among the convicts that the law is vindictive. It might be better to allow a man to protect himself from the revival of such charges by pleading guilty to them at his first trial. Punishment should cover the whole past as far as known, and a man's freedom should depend alone on his conduct after release.

I have reason to believe that quite a number of men who have served one or more terms in prison are now doing well, leading honest and reputable lives and acting as worthy citizens.

I have the honour to be, sir,
Your most obedient servant,

C. E. CARTWRIGHT,
Protestant Chaplain.

J. M. PLATT, Esq.,
Warden.

PORTSMOUTH, July 3, 1900.

SIR,—In making my annual report as Catholic chaplain for the fiscal year 1899-1900, I have nothing of an unusual nature to relate in connection with the duties incident thereto.

The general conduct of the convicts is all that can be desired, and their behaviour, while assisting at the holy sacrifice of the mass and vespers each Sunday and holy day, is beyond reproach. This is, however, I consider in a very large measure, due to the assiduity of the guards in the discharge of their duties during the divine offices. Mr. Geo. Sullivan, guard, is organist for our choir and by his careful training and faithful weekly practices of its members has added greatly to the solemnity of the divine services.

Judging from regular observation, I am pleased to say that order prevails everywhere throughout the institution, and in consequence only the best results must ensue therefrom.

I have the honour to be, sir,
Yours most respectfully,

M. McDONALD.
R. C. Chaplain.

J. M. PLATT, Esq.,
Warden.

ST. VINCENT DE PAUL PENITENTIARY.

ST. VINCENT DE PAUL, June 30, 1900.

SIR,—I beg to present my annual report regarding the Roman Catholic chapel.

During the just elapsed year the improvement mentioned for the previous year has continued and increased, so that the number of communions has been proportionately larger, the reverence and piety in the chapel more general, and even the care of cleanliness more perfect.

Our Archbishop favoured us with a pastoral visit and an exceptional mass. His Lordship, in his apostolic charity for all but most burning love for the sufferers, addressed the convicts with heartfelt words of most tender feelings and sincere congratulations for all he so happily witnessed in the institution.

The school is in very good condition.

The library, well provided with good books, affords leisure and learning to an increasing number of serious readers.

We count at present 386 Catholics. During the year 178 have come from court, 2 have come from the Protestant chapel, 133 have been released, 12 have been pardoned, 17 have been licensed (ticket of leave), 15 have been sent to Kingston, 2 have been sent to the Protestant chapel, 2 have died.

Liquor and sloth are the predominant causes of faults leading to the penitentiary. The former incites to the most criminal satisfactions, and the latter, checking noble courage and constant endeavour, prompts to guilty means, hasty aims at wealth and enjoyments. Only solid religious convictions and strong habits of piety will help society out of such plagues.

Our warden affords me a kind heart and a strong hand, and is therein followed by his whole staff. Let them all accept my sincere thanks.

Allow me, sir inspector, to express here my sentiments of deep gratitude for your constant sympathy and generous help to our chapel and to

Your humble servant,

L. O. HAREL, Priest,
R. C. Chaplain.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

ST. VINCENT DE PAUL, June 30, 1900.

SIR,—I beg to submit my report for the fiscal year ending this day.

On Sunday, the 17th of September, we held our first service in the new chapel which, however, is still unfinished. When completed according to the plans and specifications as approved by the department, it will be a great improvement on the old one. A serious disadvantage, however, is its proximity to the kitchen, as the noise caused by the preparation of meals during the time of divine service is very disturbing to the worshippers. On several occasions the minister officiating had to pause until the noise subsided. It is sincerely to be hoped that some solution of the difficulty may be found which will enable the worshippers to pursue their devotions undisturbed.

It is gratifying to be able to report that the general conduct of the men in chapel continues to be exemplary, while the heartiness with which they join in the singing and the responses is encouraging.

Eighteen of the convicts in my charge have attended the school for longer or shorter periods during the year, some of them showing by their application a real desire for knowledge.

The library has been well patronized by the men generally, while an increasing demand for books of an instructive nature is apparent in the selections made by them.

It is with saddened feelings that I report the sudden and almost instantaneous death of one of my flock on the 29th September, by an accident.

In conclusion I wish to acknowledge the uniform kindness of the warden and officers of the penitentiary generally.

I have the honour to be, sir,
Yours most obediently,

J. ROLLIT,
Protestant Chaplain.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

64 VICTORIA, A. 1901

DORCHESTER PENITENTIARY.

June 30, 1900.

SIR,—I have the honor to submit my annual report as Protestant Chaplain of this penitentiary for the year ended June 30, 1900.

On that day I had 115 convicts under my spiritual care, of whom 112 were men, and three women,—as against a total of 131 on the corresponding day of the preceding year: showing a diminution of 16, and therefore, so far, an improvement. How far the new system of granting tickets of leave has affected this showing, I will not say; but I will not hesitate to express the opinion, based upon close observation, that judiciously applied, that system is a very decided advance in the right direction; and already there is clearly visible a spirit of emulation to merit this consideration.

Since making my last annual report the work with which I am entrusted has gone on quietly, steadily, constantly. Nothing startling or out of the ordinary course has occurred, but that ordinary course has been very full of interest.

I am able to report not merely faultless behaviour at all public services, classes, or choir practices, but I am bound to bear witness to something more than that: a sense of reverence that may be felt, distinct and apart from the external decorum of enforced discipline. I have, indeed, no fault to find: so that, after making a large and liberal discount, such as the circumstances require and demand, I think I would be very wrong indeed, if in some cases I did not hope the best.

My bible class, now in its sixteenth year, has, during the past season, been in the two points of attendance and interest perhaps the most satisfactory I have yet had. Although this is a voluntary class, I have had the great satisfaction of an attendance averaging rather more than fifty.

After a period of preparation extending over several months, on Sunday, June 17, I baptized twelve men. There was an entire absence of commotion or unhealthy excitement; but an air of seriousness pervaded the service and all who took part in it. I may add that, by way of precaution, I submitted the names of these twelve men to the warden and deputy warden, as being more conversant with the men's manner of daily life than I could possibly be. They gave them all a good name.

Three of the convicts committed to my care died during the year. Two of the three lay dying in the hospital about the same time. Both were unbaptized at the time, and, after giving them such instruction as they were able to bear, I baptized them, and shortly before their death administered the holy communion. Both expressed themselves as being greatly comforted, and died humbly penitent.

Mr. Papineau continues, in my judgment, to do good work in the day school; and as to the Convict Women's Department, under Miss McMahon and her assistant, Miss Cumming, I wish to add that they are always helpful when I desire to see any, pastorally.

I am debtor to every member of the staff for courteous assistance whenever required.

The following table shows the denominational preferences of the convicts now in my care:—

Baptist.....	43
Church of England.....	40
Methodists.....	22
Presbyterians.....	8
Adventist.....	1
Protestant.....	1

I have the honour to be, sir,

Your very obedient servant,

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

J. ROY CAMPBELL,
Protestant Chaplain.

SESSIONAL PAPER No. 34

DORCHESTER PENITENTIARY, N.B., July 30, 1900.

SIR,—I have the honour to submit to you my annual report as Roman Catholic chaplain of this penitentiary, for the year ended June 30, 1900.

At the close of the fiscal year there appeared inscribed on my register the names of 86 male and 3 female convicts, a total of 89, as against 95 figuring thereon twelve months previously.

Two convicts, under my spiritual charge, died during the year.

The behaviour of the Catholic prisoners during the celebration of divine service on Sunday has been, throughout the year, a source of genuine satisfaction to myself and of undoubted edification to the guards charged with their supervision. The attendance at catechism class has been fair and interest taken therein by its different members commendable.

I cannot refrain from reiterating the fact that, it is a very sad necessity, which compels the civil power to send a relatively large number of young boys to be incarcerated here. They can hardly be expected to be benefited morally. The criminal atmosphere of a penitentiary will naturally foster the yet tender germs of crime in those youthful natures and soon fan them to their full development. In most cases it is an apprenticeship to a life of crime, as inoculated in them by the unavoidable contact with old and hardened criminals. Assuredly they are the ones, on account of their age, who under favourable circumstances, can be expected to be reformed under the benign influence of religion, and a large percentage therefore could be rescued from the destruction of rising passions, and diverted from the incipient instinct of crime. Confronted with such bare facts we are brought to acknowledge that it would be a most commendable action on the part of the Department of Justice to endeavour to bring a remedy to the above existing state of affairs.

The excellence of the sacred music furnished by a good and strong choir, under the efficient management of our zealous organist, Mrs. LeBlanc, is well calculated to help in uplifting those poor souls, and to lead them to their God. I am only sorry to state that the noble efforts of our organists, both Protestant and Catholic, to sustain this good standard of religious music at the prison services, are not seconded, and especially not rendered pleasant by having a better musical instrument than what we have now in the chapel. I would beg, Mr. Inspector, to call your immediate attention to this very important matter.

Libraries are well patronized and books regularly distributed. The school continues to do excellent work and is well managed.

I cannot conclude this report without paying a tribute of high encomium to the good and amiable relations existing amongst the different members of the staff. I must also express my very great appreciation of the courtesy shown to me on all occasions by the warden and staff.

I have the honour to be, sir,

Your obedient servant,

A. D. CORMIER.

R. C. Chaplain.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

MANITOBA PENITENTIARY.

STONY MOUNTAIN, Man., July 25, 1900.

SIR,—I have the honour to submit my annual report as Protestant chaplain of the Manitoba Penitentiary for the year ended June 30, 1900.

The duties performed were about the same as last year. Our public service continues to be characterized by deep solemnity and holy awe as though all felt the Divine Presence. Guard Ward still aids us in the service of sacred song and we are thankful for the additional help received from our organist, Mr. Grant. I am happy to be able to state that some of the convicts who have been discharged from here are giving evidence to the fact of a changed life and commanding the respect and confidence of all they come in touch with.

Mr. Beaupré and his excellent staff of monitors are doing good work in the school. My warmest thanks are due, and here tendered, to the warden and his staff of officers for their uniform kindness and valuable assistance rendered me in the discharge of my duties.

F. M. FINN,
Protestant Chaplain.

D. STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

SESSIONAL PAPER No. 34

STONY MOUNTAIN, Man, July 1, 1900.

DEAR SIR,—I have the honour to send my annual report for the year ended yesterday.

At the end of the year I had thirty-one convicts under my charge. By their conduct they have given me satisfaction generally. Some of them have been doing very well, and I would take the liberty to suggest that they may be granted the privilege of the conditional release.

I have the honour to be, sir,
Yours, &c.,

G. CLOUTIER, Ptr.,
Roman Catholic Chaplain.

The Inspector of Penitentiaries,
Ottawa.

BRITISH COLUMBIA PENITENTIARY.

July, 1900.

SIR,—I have the honour to submit my report for the year ended June 30, 1900.

Number of convicts under my care June 30, 1899.....	55
“ received during the year.....	28
“ discharged during the year.....	28
“ remaining June 30, 1900.....	57
First term in prison.....	49
Foreign prisons	2
Provincial prisons.....	6

During the year one female convict was transferred to the Roman Catholic chapel. Those under my care have enjoyed good health. None have been confined to the hospital and only a few have been treated in the cells.

The conduct of the prisoners during divine service has been all that could be desired. They are most attentive to the instruction given, and my hope is that the seeds of truth thus sown may be productive of fruit though it should be after many days.

I continue the class for the instruction of some of the young men at the close of the regular service on Sabbath. Then I spend some time in the chapel conversing with the convicts separately. I believe these earnest conversations are calculated to do much good. In this way I can get near to the men and many of them speak of their mental and spiritual difficulties, and by the blessing of God some have evidently been helped.

We have had a few services conducted by a Japanese missionary. We have likewise had services for the Chinese who are still with us. These pagans are thankful to have one of their own countrymen speak to them in their own language. My hope and prayer is that the blessing of Almighty God may attend the efforts put forth for their reformation and regeneration.

I desire to thank all the officers for their continued courtesy to me in the discharge of my official duties.

I have the honour to be, sir,
Your obedient servant,

THOMAS SCOULER,
Protestant Chaplain.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

NEW WESTMINSTER, B.C., August, 1900.

SIR,—I have the honour to submit my annual report as Roman Catholic chaplain of the British Columbia penitentiary for the year ended June 30, 1900.

The services during the year have been regularly held. The conduct of the men during divine service has been all that could be desired.

During the last six months I have devoted an hour each Friday to direct the choir practices. This attention has been duly appreciated by the convicts, and has contributed to enhance the solemnity of divine service.

Our library, as my brother chaplain already remarked in his last year's report, needs replenishing. Many of the convicts assure me that they have read all books in it. I sincerely hope that more will be added soon; it is several years since we had our last addition.

Larger chapels are very much needed, owing to the permanent increase of convicts.

I am pleased to state that the school, under the care of Mr. Carroll, continues to do good work.

In concluding, I have only words of praise to address to the warden, deputy warden, and the other officers of the prison for their uniform kindness and courtesy in assisting me in the discharge of my duties.

I have the honour to be, sir,
Your obedient servant,

CH. L. DEVRIENDT,
R. C. Chaplain.

APPENDIX D

SCHOOLMASTERS' REPORTS

KINGSTON PENITENTIARY.

KINGSTON, ONT., July 26, 1900.

SIR,—I have the honour to submit my fifth annual report of the school in this penitentiary for the year ended June 30, 1900.

The total number enrolled during the year was 83. Of this number 19 passed out capable of reading and writing intelligently and with a fair knowledge of the elementary rules of arithmetic ; 14 retired, some owing to expiration of sentence and a few from lack of application.

The present attendance is 50, and the studies of these are divided as follows :—

Reading in Part I	6
“ II	12
Reading in 2nd book and writing.....	10
“ 3rd book, writing and arithmetic.....	22

I may state that the conduct and application of the pupils have been excellent.

Instruction is given during the noon hour in the school-room, and in their respective cells in the evening, and it is surprising the progress made by many who could neither read nor write when admitted.

Mr. Thompson, assistant school instructor, has been very attentive in the discharge of his duties.

I have the honour to be, sir,
Your obedient servant,

W. A. GUNN,
School Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

LIBRARY Return for the year ended June 30, 1900.

	Total Number of Volumes in Library.	Number added during Year.	Average Number of Convicts who used Works.	Total Number of Issues during the Year.
General library.....	3,269	35	458	22,162
Protestant library.....	370	74	120	6,240
Roman Catholic library.....	513	13	95	4,940
Totals.....	4,152	122	673	33,342

Thirty-five volumes added to general library consisted of 120 magazines bound in the prison.

The volumes formerly kept in the churches have been removed, and are now issued from the general library.

Seventy-four and thirteen volumes added during the year were presented to the Protestant and Roman Catholic libraries respectively.

W. A. GUNN.

ST. VINCENT DE PAUL PENITENTIARY.

ST. VINCENT DE PAUL, July 1, 1900.

DEAR SIR,—I have the honour to submit my eighteenth annual report as school-master and librarian of this institution for the year ended June 30, 1900.

Seventy-five pupils were registered during the year. The average daily attendance was 46.5.

The school has been attended during the year by 115 pupils classified as follows :—

Reading, translation, grammar, parsing, arithmetic.....	44
Reading, spelling, writing from the book, arithmetic.....	40
Spelling, ciphering, writing, tables, arithmetic.....	31
English-speaking pupils who attended school.....	26
French-speaking pupils who attended school.....	89

Fair progress was made by the majority of the pupils and their conduct, during the school hours, was satisfactory.

A good number of men who could not attend school were supplied with books and slates to study in their cells.

The library continues to increase in importance and usefulness, owing to the addition of new books and the repairs done to many of the old stock.

I beg to express my gratitude to the warden, chaplains and superior officers for the facilities afforded me in the discharge of my duties.

I have the honour to be, sir,
Your obedient servant,

J. T. DORAIS,
School Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

J. T. DORAIS,
Librarian.

DORCHESTER PENITENTIARY.

DORCHESTER, N.B., August 7, 1900.

SIR,—I have the honour to submit my third annual report of the school of this penitentiary for the fiscal year ended June 30, 1900.

One hundred and eighteen convicts were registered as pupils during the year. The highest number enrolled during any one month was eighty, and the average daily attendance was fifty-four.

At the close of the year the school was attended by seventy-one pupils, classified as follows :—

Reading, writing and arithmetic	44
Reading and writing	18
Reading only	9

Nine were reading in the 5th reader, eleven in the 4th, sixteen in the 3rd, nineteen in the 2nd, eight in the 1st, and eight in the primers.

I am pleased to state that during the year good progress was made by the majority of the pupils, and that their conduct was most satisfactory.

Most of those who do not attend school are supplied with school books and slates for study in their cells.

I beg to express my gratitude to my superiors for their kind assistance in the discharge of my duties.

I have the honour to be, sir,
Your obedient servant,

G. B. PAPINEAU,
School Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

64 VICTORIA, A. 1901

G. B. PAPINEAU.

MANITOBA PENITENTIARY.

STONY MOUNTAIN, July 20, 1900.

SIR,—I have the honour to submit my annual report as schoolmaster of this institution for the fiscal year ended June 30, 1900.

The number of pupils enrolled during the year was 23, and the daily attendance averaged 14·5.

The present attendance is 14, and the studies are divided as follows: three are reading in the 1st book, eight in the 2nd, three in the 3rd, and eight are learning arithmetic also.

I also gave instructions and corrected the work of twelve convicts who studied arithmetic in their cell.

The conduct and industry of those attending school were most satisfactory while under my charge, and the progress made by some of them was very good.

I beg to express my thanks to my superiors for the assistance given me in the discharge of my duties.

I have the honour to be, sir,

Your obedient servant,

J. O. BEAUPRÉ,
School Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

SESSIONAL PAPER No. 34

STATE of education of convicts June 30, 1900.

—	Number.	—	Number.
Can read and write.....	87	Cannot read or write.....	10
Can read only	9	Total.....	106

LIBRARY Return for Year ended June 30, 1900.

—	Total number of volumes in library.	Number added during the year.	Average number of convicts who used books.	Total number of issues during the year.
General library.....	497	102	143	5,541
Protestant library.....	220	105	760
Roman Catholic library.....	154

The 102 volumes added to the general library are the ones transferred from Protestant and the Roman Catholic libraries to the general.

As mostly all the books of the Roman Catholic library were transferred to the vestry of the Roman Catholic chapel, and were issued by the chaplain, therefore no record of issues was kept of them.

J. O. BEAUPRÉ,
Librarian.

BRITISH COLUMBIA PENITENTIARY.

NEW WESTMINSTER, B.C., July 1, 1900.

SIR,—I have the honour to submit my annual report of the school of this penitentiary for the fiscal year ended June 30, 1900.

The number of convicts admitted during the present year was 15, and the average attendance 16·8. Of the 15 convicts admitted to the school, 6 began with the alphabet, 2 the first primer, 1 the first reader, Part I., 1 the second reader, 1 the third reader, and 4 were admitted for arithmetic only.

At the close of the year the school was attended by 25 pupils, classified as follows :—

Primer.....	6
First reader, part I.....	2
First reader, part II.....	5
Second reader, arithmetic, spelling and writing.....	2
Third reader, arithmetic, spelling and writing.....	4
Arithmetic only.....	6

I am pleased to be able to state that the pupils who attended school during the past year have made good progress ; the conduct and discipline during school hours is most exemplary, and the attention paid to their lessons has been very satisfactory.

A large number of those who do not attend school are supplied with school books and slates for study in their cells.

In conclusion I must thank my superiors for the assistance given me in the discharge of my duties.

EDUCATION—1899-1900.

Can read and write English.....	74
“ Finnish.....	1
“ Japanese.....	2
“ Portuguese.....	1

Cannot read or write.....	24
Total.....	104

I have the honour to be, sir,
Your obedient servant,

W. J. CARROLL,
School Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

APPENDIX E

MATRONS' REPORTS

KINGSTON PENITENTIARY.

KINGSTON, June 30, 1900.

SIR,—I have the honour to submit my annual report of the female prison.
There are eleven women in the institution ; eleven were discharged during the year and three received.
Their general behaviour has been good. Their industry, for the very small number has been excellent, as the returns clearly show.

I have the honour to remain, sir,
Your obedient servant,

R. A. FAHEY.
Matron.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries.
Ottawa.

APPENDIX L

FARM REPORTS

FARM INSTRUCTOR'S REPORT.

KINGSTON PENITENTIARY, August 15, 1900.

SIR,—I have the honour to present my annual report as farm instructor at Kingston Penitentiary for the year ended June 30, 1900.

All our arable land is at present in good state of cultivation and is yielding, in favourable seasons, all that can reasonably be expected. The appended statement will show that, after furnishing healthful employment, under careful instruction and discipline, for 3,132 days prison labour, a net profit of over \$500 was realized for the year just closed.

I am of opinion that an additional fifty acres could be profitably and advantageously worked, especially if such additional land were adapted to garden farming; that is, the growing of roots and vegetables for prison consumption. A much larger grain product might also be profitably used in production of pork.

The compost pits recently constructed are proving decidedly advantageous. Most of the stable manure purchased is in a dry condition, and is made much more valuable by the addition from the prison sewage. I would recommend, however, that a small sum be expended each year in the purchase of some standard artificial fertilizer for such lands as are put under roots and vegetables.

The farm buildings are in good repair, but I beg leave to recommend that the walls of No. 1 barn be raised to eighteen feet and that horse forks and tackle be provided for unloading hay and grain. This would give plenty of room for larger crop and remove the necessity of threshing during the harvest.

The old picket fence extending the entire length of the farm on the east side should be removed and a wire fence put in its place, thus avoiding drifts of snow which blockade the highway and keep the ground cold and wet till late in the spring. Several pieces of waste land can be made arable by removing the stones and filling with soil excavated from new roadbed now being made over the farm. The fifteen acres of rough, untillable quarry grounds can be similarly improved so as to be valuable for pasturage; and cattle sufficient to supply the prison with milk might be maintained thereon for several months of the year. To do all this would, of course, require more labour than is furnished by the usual farm gang but would, I think, amply repay the outlay by improvement in appearance as well as by the increase of production.

I feel indebted to the warden for the very deep interest he takes in my department and his readiness, at all times, to aid me in the discharge of my duties.

Yours respectfully,

JNO. A. McCAUGHERTY.

Farm Instructor.

DOUGLAS STEWART, Esq.

Inspector of Penitentiaries,
Ottawa.

SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL, June 30, 1900.

SIR,—I have the honour to submit herewith statements for the fiscal year ended June 30, 1900.

I am pleased to be able to report that the general turn over has been satisfactory, every portion of the farm under cultivation having yielded a fair return for the labour expended. Considerable improvement was made during the year by levelling and grading the numerous abrupt slopes bordering on the ravines, and by placing in cultivation the old brick-yard grounds, the whole of which produced a good crop of grain and promises to prove more remunerative during the coming season. Similar improvements, including under-drainage, will be put in hand this fall and I have every hope that the result may prove satisfactory. The necessity for enlarging the farm is admitted, and an addition to it of sufficient acreage to admit of a proper rotation of cropping would furnish the penitentiary with the farm produce required and at a much less cost than is possible by the present cramped system which cannot be avoided on a farm of small area. The purchaseable real estate in the immediate vicinity of the penitentiary will not be found sufficiently fertile to produce the desired results for a few years, as it will require under-drainage and careful cultivation.

The year shows an increase in the production of pork, 109 pigs were dressed and delivered to the steward, leaving 300 on hand to date. I increased the stock with a view to furnishing the institution with all the pork required, upon the understanding that the piggery buildings would be enlarged.

I desire to tender my thanks to the warden for his courteous consideration and invariable attention during the past year.

I have the honour to be, sir,
Your obedient servant,

EDW. KENNY,
Farm Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

EDW. KENNY,
Farm Instructor.

DORCHESTER.

DORCHESTER, July 30, 1900.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1900.

The season opened finely, and seeding began on the 1st of May, 1899, and continued till the 15th. The weather from that date until the middle of June was broken, so that part of the seeding was not finished until the end of June.

I am pleased to report a good crop ; hay and oats, extra ; barley, fair ; turnips, good ; potatoes, medium ; carrots, beets and cabbage, all good.

The stock is the best, both in quantity and quality ever grown on the farm.

Considering the amount of work required in building operations and the broken weather during the seeding time, I can claim for the farming operations a fairly good year's work.

I have the honour to be, sir,
Your obedient servant,

A. B. PIPES,
Farm Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

Farm Instructor.

MANITOBA.

STONY MOUNTAIN, July 20, 1900.

SIR,—I have the honour to submit my report as farmer of the Manitoba Penitentiary. I am sorry to say our prospects for an abundant harvest are most unfavourable, owing to the severe drought, which has prevailed all spring and summer, no rain having fallen until the first of July. We have had to plow under twelve acres of wheat and fifteen acres of oats. The oats were on new land—the first crop. The only land that withstood the drouth was summer-fallow and potato ground. About the 10th of June the crops were looking so bad that I ploughed and sowed twenty-five acres with barley that I had intended to fallow and with the recent rains it promises to be a fair crop. Our and barley that were sown on fall ploughing will not be half a crop, and our roots and garden seeds that were sown, some as early as the 5th of April, were not above ground until the 5th of July. At one time it looked serious on account of fodder for the stock during the coming winter, but all fears of that are past now. We have about 225 acres under cultivation, which is about as much as can be worked with the labour available on account of other works that are going on. Our cattle are increasing; we now have forty head, and our stable will only hold twenty-four; we will have to convert part of the hay barn into a cattle shed for the present. The cattle are one of the best investments we have they have increased over \$100 since last year after selling about \$200 in beef at very little outlay. In 1892 the warden purchased one milch cow, there only being two yearling heifers on the farm. Our present herd is the increase since that time, also the steers that were killed for beef and two cows poisoned three years ago. We are at a great disadvantage with our present buildings not being able to make permanent improvements such as fencing yard and hog pasture, &c. Once the new barn is built everything can be done with a view to future requirements. The slaughter house built last fall is a great convenience to the piggery. The warden still takes a great interest in the farm.

I am, sir, your obedient servant,

W. R. GRAHAME,
Farm Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

W. R. GRAHAME,
Farm Instructor.

BRITISH COLUMBIA.

NEW WESTMINSTER, August 18, 1900.

SIR,—I have the honour to submit my annual report for the year ended June 30 1900.

We have but 70 acres of land within the penitentiary boundary fence, of which 30 acres are under cultivation, the balance of which is taken up by a very deep ravine, of little use, even for pasturing purposes.

The warden is now having 32 acres cleared, outside of the boundary fence, which when finished will give us a larger area for cultivation, but I do not think that we will then have sufficient land under cultivation to furnish this institution with the farm produce required.

We have this year purchased 6 pedigreed sheep which in time will give us quite a supply of mutton for this institution.

I am, sir,
Yours very respectfully,

JNO. McNIVEN,
Farm Instructor.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

APPENDIX M

REGINA JAIL

REGINA JAIL.

JAILOR'S REPORT.

REGINA, July 28, 1900.

SIR,—I have the honour to submit my annual report for the fiscal year ended 30th June last.

The movements of prisoners during the year were as follows:—

	Lunatics.			Other Prisoners.			Total.	
	Male.	Female.	Total.	Male.	Female.	Total.		
Remaining at midnight June 30th, 1899.....			...	21	...	21	21	72
Received since	8	4	12	34	5	39	51	
Removed to Brandon Asylum... ..	8	4	12				12	50
Expiration of sentence				31	3	34	34	
Pardons.....				2		2	2	
Parole.....				1		1	1	
Escape.....				1		1	1	
Remaining at midnight June 30th, 1900.....				20	2	22	22	22

The daily average during the year was $22\frac{306}{365}$ as against $15\frac{317}{365}$ in the previous year. There was one escape, the particulars of which were duly reported to you. There were no deaths.

I again beg to call your attention to the fact that twelve insane persons from different points in the Territories were committed during the year to this prison. There seems no reason why most of these unfortunates should not have been taken direct from their several homes to an insane asylum, especially from such points as Calgary and Medicine Hat, where one would presume the necessary medical testimony could have been secured to admit of that being done, the Ordinance regarding insane persons having been amended in that direction some time ago. I hope that before long this prison will be used only for the custody of convicted persons.

The result of our farming operations was again satisfactory, the prison having been supplied with all necessary vegetables and the stables with forage excepting hay. The cultivation and cleaning of new land was again continued during the year, and I hope in the near future to be able to grow all the hay that may be required with possibly a surplus.

As you are aware the sewerage empties into a cesspool and from there has to be pumped out and carried away. The cesspool is constructed of wood, has been in use for ten years, and in order to avert any possible accident I beg to recommend for your consideration the construction of a brick and Portland cement cesspool, if possible further away from the prison building. According to the situation of the prison and its surroundings the cesspool system of drainage seems the only available one.

The roof of the prison building has also become somewhat leaky, especially at the junction of the main building and cell wing, caused, I presume, through the settlement of the latter owing to its great weight. I have also observed water coming in around some of the chimneys.

64 VICTORIA, A. 1901

I also beg to call your attention to the inefficient and expensive heating system. In winter it is impossible to heat some portions of the building, which may be caused either by an inefficient heating system or inefficient construction of the building, or possibly by both.

With regard to the cesspool, the roof, the heating system and, I may add, the building in general, I beg to suggest that you cause an inspection to be made by some competent person with the view of having any serious defects remedied at an early date.

The Honourable the Minister of Justice favoured this institution with a visit during September last, which I have pleasure in recording.

I have the honour to be, sir,
Your obedient servant,

A. L. LUNAN,
Jailer.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

SURGEON'S REPORT.

REGINA, July 2, 1900.

SIR,—By instructions of the jail surgeon I have the honour to report, that since my incumbency, I have found the sanitary condition of the jail good as well as the general health of the prisoners.

The months preceding for the year show by the register that no prevailing disease or epidemics had existed.

The custom of allowing prisoners to have possession of medicines, when prescribed was disapproved, for various reasons, which when explained to the jailer acted at once on my suggestions, since which the officer on duty sees to it being properly administered. The results are none is wasted and fewer malingerers.

The necessity of pumping out the cesspool so frequently and to overcome the offensive odour that arises in such proximity to the cells, which should a contagion of any kind exist, would aggravate the situation by disseminating the germs amongst others, who reside in the vicinity; is a contention difficult to overcome, and I would respectfully call your attention to this at your next visit.

Some provision should be made for isolating a prisoner having a contagious disease, or even being exposed to it. This was brought to my notice by a prisoner, who had been confined in the barracks prison, when the place was quarantined for an alleged outbreak of diphtheria. Objections were made to his being brought into court until all danger of communicating the disease had passed, in consequence of the exposure, greatly endangering other inmates of the prison as well as the court officials.

Owing to small-pox of a malignant type occurring to a person who had passed through on the railroad and the majority of prisoners coming by the same road, precautionary means were resorted to, by vaccinating all of the inmates who had not a distinct mark of having been vaccinated.

The continued practice of committing the insane to this prison from other places, when the local legislature had passed an ordinance to have them transferred directly from their homes to an asylum, is very reprehensible. It not only adds to the expense, but a greater objection is the odium that becomes attached to the poor unfortunates by being confined in such a place, both of which would be averted if the law were carried out.

I would direct your attention to the amount of drugs on hand, many being of no use, while the supply of others is greatly in excess of the requirements of the place.

SESSIONAL PAPER No. 34

In conclusion, I have through you to proffer my thanks to the officers of the prison, for the attention given to my suggestions and for the courtesy they have at all times extended to me.

I have the honour to be, sir,
Your obedient servant,

I. F. INGERSOLL,
Jail Surgeon (Pro tem.)

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

MATRON'S REPORT.

REGINA, 2nd July, 1900.

SIR,—I have the honour to report that during the fiscal year ended June 30 last there were nine female prisoners placed under my care as follows :—

Insane.....	4
Other prisoners.....	5
Total.....	9

The insane were removed to the asylum for the insane at Brandon. Three of the others were discharged in due course, leaving two in custody at midnight on June 30
As far as circumstances would permit the prisoners were employed as usual a such work as scrubbing, washing and sewing.

I have the honour to be, sir,
Your obedient servant,

FLORA HOURIE,
Matron.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

APPENDIX N

PRINCE ALBERT JAIL

PRINCE ALBERT JAIL.

JAILER'S REPORT.

PRINCE ALBERT, July 4, 1900.

SIR,—I have the honour to submit my annual report with sundry returns for the fiscal year ended June 30, 1900.

Owing to the regrettable death of the late jailer, H. J. Montgomery, which occurred on January 16 last, I have been filling the vacancy for the past six months.

There has been no death, pardon or escape during the year.

The daily average during the year was $3\frac{4}{5}$. The net cost per capita, \$1,216.41, is large, but when you take into consideration the small daily average, and that we have expended \$150 as part payment on acetylene gas machine ; also \$127.20 on repairs to west end of jail wall, which were in a very unsafe condition ; also that the heating of the court rooms and sheriff's office is done by the jail, you will not find the cost excessive.

Under the head of "Heating" in the financial statements you will find a charge for coal of \$344.75, and I think that as we heat the court rooms and sheriff's offices throughout, that one half of this amount should be charged against that department of the service ; one half the firemen's salary should be also charged, making a total of \$322.07. This would materially lower the expenditure, and I am strongly of the opinion that in justice to the jail it should be done.

Something should be done in the way of providing more land. At present I have only about one acre that I can cultivate, and find it difficult to keep the prisoners profitably employed. Land could be procured in the immediate vicinity of the jail at a small cost, and I would recommend the purchase of twenty or thirty acres.

The high board fence that incloses part of the jail grounds should be extended all the way around so that persons passing on the street could not annoy the prisoners while at work. This fence could be built at a small cost, the labour being done by the prisoners, and the old materials could be used as far as they would go.

I would recommend that the old buildings at the south end of the prison stable be torn down. These buildings are built of odds and ends of old lumber and covered with sods, and are unsightly, and I hope instructions will be at once given to have them removed, as they are a disgrace to the prison grounds.

The water supply is inadequate. At present we have not water enough, and the sewage pipes cannot be properly flushed. The artesian well borers are working here, and have gone down 700 feet. They have struck a stream of water, but it is of no use, either in the prison or for flushing purposes, as it is full of salt. In the event of their not finding good water some other system will have to be adopted, as a good supply of pure water is absolutely necessary for the jail.

I would again call your attention to the necessity of purchasing a horse, harness, wagon and buckboard for the use of the jail. The cesspool will in future require cleaning about every three weeks—it is built of wood and is becoming saturated with sewage, and there is a strong odour coming from it, and it will require frequent cleansing. The cost of emptying is \$6. If we had a horse and outfit the work could be done by the prisoners, and in a short time the outfit would pay for itself.

The conduct of the prisoners has been good, only one case of punishment being recorded.

During the year two lunatics were committed to my charge ; one was brought before the court and discharged, the other is still under my care.

I hope that in the near future the whole of the building will be given over for jail purposes. We require more room, and necessary changes will have to be made before part of the jail rules and regulations can be put in operation. The result of not being able to put them in force is a constant source of annoyance.

64 VICTORIA, A. 1901

Considerable improvements have been made on the prison grounds. They have been levelled up, ditches have been made, and the whole place generally presents a creditable appearance.

The prisoners have been employed on above and other work, such as sawing wood, gardening, washing and scrubbing.

I have the honour to be, sir,
Your obedient servant,

F. W. KERR,
Acting Jailer.

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

SURGEON'S REPORT.

PRINCE ALBERT, July 5, 1900.

SIR,—I have the honour to submit my report for the year which ended June 30, 1900.

The institution sustained the loss of a good and faithful officer by the death of the jailor, H. J. Montgomery, during January last. The health of the prisoners has been on the whole, good.

Last year I mentioned the fact that the cesspool was constructed of wood but was then giving no trouble ; I regret to report that the wood is evidently now absorbing the sewage as the stench of excrementitious matter is constantly present about the building over the cesspool and in the immediate vicinity. The water supply is very inadequate ; the piping about the building cannot be flushed out as often as is required.

If at any time we had a serious case of illness among the prisoners there would be great difficulty accommodating it on the premises, there being no place that could be set apart for that purpose.

I herewith inclose statement of cases that have come under treatment in the jail here during the past year.

I have the honour to be, sir,
Your obedient servant,

DOUGLAS STEWART, Esq.,
Inspector of Penitentiaries,
Ottawa.

H. A. LESTOCK REID, M.D.

MATRON'S REPORT.

PRINCE ALBERT, July 2, 1900.

SIR,—I have the honour to submit my annual report for the fiscal year ended June 30, 1900.

The following is a statement regarding the prisoners under my care during the period :—

In custody June 30, 1899	3
Received since	0
Total	3
Discharged	3
Remaining at midnight, June 30, 1900	0

The prisoners have been employed at sundry work, such as washing, scrubbing and sewing. Their conduct was good.

I have the honour to be, sir,
Your obedient servant,

MARY MONTGOMERY,
Matron.

DOUGLAS STEWART, Esq.,
Inspector Penitentiaries,
Ottawa.
